Explaining Algorithms Using Metaphors Michal Forišek,Monika Steinová,2013-04-09 There is a significant difference between designing a new algorithm proving its correctness and teaching it to an audience When teaching algorithms the teacher s main goal should be to convey the underlying ideas and to help the students form correct mental models related to the algorithm This process can often be facilitated by using suitable metaphors This work provides a set of novel metaphors identified and developed as suitable tools for teaching many of the classic textbook algorithms taught in undergraduate courses worldwide Each chapter provides exercises and didactic notes for teachers based on the authors experiences when using the metaphor in a classroom setting **Collected papers** Carroll Lane Fenton,1918 **Brehm's Life of Animals** Alfred Edmund Brehm,1896 **The Doomsday Calculation** William Poundstone,2019-06-04 From the author of Are You Smart Enough to Work at Google a fascinating look at how an equation that foretells the future is transforming everything we know about life business and the universe In the 18th century the British minister and mathematician Thomas Bayes devised a theorem that allowed him to assign probabilities to events that had never happened before It languished in obscurity for centuries until computers came along and made it easy to crunch the numbers Now as the foundation of big data Bayes formula has become a linchpin of the digital economy But here s where things get really interesting Bayes theorem can also be used to lay odds on the existence of extraterrestrial intelligence on whether we live in a Matrix like counterfeit of reality on the many worlds interpretation of quantum theory being correct and on the biggest question of all how long will humanity survive The Doomsday Calculation tells how Silicon Valley s profitable formula became a controversial pivot of contemporary thought Drawing on interviews with thought leaders around the globe it s the story of a group of intellectual mavericks who are challenging what we thought we knew about our place in the universe The Doomsday Calculation is compelling reading for anyone interested in our culture and its future *The Web* ,1988 **Of all degrees, by Leslie Keith** Grace L.
