Constitution As Political Structure:

The Constitution as Political Structure Martin H. Redish, 1995 Over the last forty years modern constitutional scholarship has concentrated on an analysis of rights while principles of constitutional law concerning the structure of government have been largely downplayed The irony of this interpretive emphasis is that the body of the Constitution contains relatively little dealing directly with rights Rather it is primarily a blueprint for the establishment of a complex form of federal democratic structure The Constitution as Political Structure emphasizes the central role served by the structural portions of the Constitution Redish argues that these structural values were designed to provide the framework in which our rights based system may flourish and that judicial abandonment of these structural values threatens the very foundations of American political theory In its exposition of the textual and theoretical rationales for judicial enforcement of the structural values embodied in the Constitution this book presents a principled alternative to the extremes of judicial abdication articulated by certain scholars and Justices on the one hand and the result oriented ideological involvement advocated in some quarters on the other This work will be of great interest to scholars of law and political science Constitutions and Political Theory Jan-Erik Lane, 1996 Jan Erik Lane begins by examining the origins and history of constitutionalism the doctrine that the state must be regulated by means of a set of institutions that guarantee citizen rights and procedural accountability He then examines the structure of the state in order to identify the essential elements that constitutional institutions regulate Lane asks why constitutions exist and how they matter for society Finally he seeks out the requirements for a fair and democratic constitution by referring to three key concepts in political theory justice equality and the rule of law The book also offers a comparative survey of formal constitutional arrangements in different countries and an analysis of how constitutions develop in practice through the implementation of constitutional and administrative law in a country's courts
