major countries of the world UK USA France and China There is a justification for selecting these constitutions in this work as they are the representative constitutions representative in the sense they were the nations where the constitutional practices had first witnessed and experimented historically They remain as referential authorities for clarification and citations If UK is known for parliamentary type of governmental operations the USA is an authority on presidential form of government with authoritarian postures France is an example for a mixture of democratic and communist experiments with multiple parties and the reason for picking up the Chinese constitution for investigation is best known It is the only surviving communist model in the world Though several works have cropped up recently around the subject focusing on different aspects of these constitutions this work is in a sense unique as an attempt is made here to present the original articles of the constitution in verbatim Moreover the volume presents a fairly comprehensive view of the working of the parliamentary presidential and communist patterns of government and demonstrates patently why these constitutions should remain reference texts

Secret Proceedings and Debates of the Convention Assembled at Philadelphia, in the 1787, United States. Constitutional Convention, 1838 This volume includes notes from closed door meetings centered around ratifying the U S Constitution to include the foundational Bill of Rights The volume proclaims that there are no other written testimonies concerning the secret proceedings of the federal convention aside from those from James Madison himself
