Creating Texts Walter Nash, David Stacey, 2014-09-25 *Creating Texts* emphasises a practical approach to composition and enables students to understand what is involved in the creation of a text and to learn from the practice of other writers Extensively rewritten and updated from Walter Nash s earlier volume *Designs in Prose* attention is paid to the general theory of composition in both traditional and original terms so that students are made familiar with the basic resources of composition in grammar and in the lexicon The essence of every chapter is the discussion of examples of text sometimes devised by the authors but more often drawn from the work of authors writing in diverse styles of English This practical approach is most evident in the final section of the book where detailed suggestions for projects and exercises reinforce the connection between theory and practice and encourage students to develop their creative sense and to adapt their style of writing to fit the particular audience and context In addition this section is cross referenced to the main text to allow students to consult easily the relevant chapter
