[Contracts for Infrastructure Projects](#) Philip Loots, Donald Charrett, 2022-05-18 [Contracts for Infrastructure Projects An International Guide](#) provides a guide to the law relating to construction contracts for infrastructure projects it is intended for the use of engineers and other professionals who are involved in the negotiation and administration of construction contracts to enable them to understand the risks involved and how to minimise them The principles of construction law outlined in this book apply to small construction contracts as well as very large contracts for which the contract sum may be in the billions of dollars The focus of the book is on construction contracts entered into by commercial organisations operating in a business environment Contract law generally assumes that such parties are of equal bargaining power and puts relatively few fetters on their ability to agree on the terms of their bargain However where legislation impacts on the execution of construction projects or the operation of construction contracts it may be of major importance in protecting the rights of weaker parties or third parties It is assumed that the users of this book will be familiar with the general concepts of tendering and contracting for engineering and construction projects but may not have any formal knowledge of the law To the extent possible the emphasis is on general principles of contract law that are widely accepted in many jurisdictions Examples are drawn from case law in a number of

common law jurisdictions as well as from civil codes
