Constructions Of Intersubjectivity Discourse Syntax And Cognition:

Constructions of Intersubjectivity Arie Verhagen, 2005-05-26 *Constructions of Intersubjectivity* shows that the meaning of grammatical constructions often has more to do with the human cognitive capacity for taking other people's points of view than with describing the world. Treating pragmatics, semantics, and syntax in parallel and integrating insights from linguistics, psychology, and animal communication, Arie Verhagen develops a new understanding of linguistic communication. In doing so, he shows the continuity between language and animal communication and reveals the nature of human linguistic specialization. Professor Verhagen uses Dutch and English data from a wide variety of sources and considers the contributions of grammar to the coherence of discourse. He argues that important problems in semantics and syntax may be resolved if language is understood as an instrument for exerting influence and coordinating different perspectives. The grammatical phenomena he discusses include negative expressions, the let alone construction, complementation constructions, and discourse connectives. This powerfully argued and original explanation of the nature and operation of communication will interest a wide range of scholars and advanced students in linguistics, cognitive science, and human evolution.

Ten Lectures on Cognitive Evolutionary Linguistics Arie Verhagen, 2021-06-22 In these lectures, Arie Verhagen presents a version of cognitive linguistics that adheres to both the generalization and cognitive commitments that characterized the field from the start and a biological commitment: understanding language as adaptive behavior of human organisms in the niches that they inhabit. Drawing on the model of biological explanation, Tinbergen's four whys, Verhagen shows how proximate, individual-level and ultimate, population-level explanations apply to several features of language, shedding new light on basic notions like conventionality and entrenchment, norms, rules, and habits, etc., and their causal connections. Topics include the relation between language, culture, and thinking; the role of language in social cognition and narrative; the evolution of sound structure and grammar; semantic change, and more. **The Routledge Handbook of Cognitive**
