Classroom Collaboration

Phillida Salmon, Hilary Claire, 2020-03-09 Originally published in 1984 this is an account of a two year study of four comprehensive school classrooms where teachers were fostering collaborative learning methods The authors draw on their joint knowledge and experience as a psychologist and a teacher to give an insight into pupils perceptions of their schooling and a dynamic analysis of the process of education that they experienced Working on the premise that successful collaboration demands common goals and mutual understanding the author observed pupils at work transcribed their talk and carried out interviews with both pupils and their teachers They show how individual children can support and learn from each other document the social and psychological features underlying the use or non use of collaboration and take the teachers own frames of reference as a standpoint in evaluating success The authors findings were intended to encourage teachers to move away from the traditional view of education as the transmission of knowledge to passive pupils Social relationships within the classroom can potentially be not merely a source of disruption but the basis of learning itself This possibility is particularly significant in the context of inner city schools where there is often mutual mistrust and hostility across lines of race class gender or ability

Struggling for Autonomy in Language Education

Flávia Vieira, 2009 Pedagogy for autonomy is a continuous struggle for transformative and empowering education That struggle entails reflecting on what fosters or hinders teacher and learner development acting towards challenging and reshaping oppressive forces and

circumstances and being willing to deal with complexity uncertainty and risk taking without losing one's hopes and ideals
 Our main purpose is to present and discuss ways in which critical reflecting acting and being emerge in contexts of teaching
 and or teacher education not as realisations of a grand theory of pedagogy for autonomy but rather as local idiosyncratic
 struggles to grasp and enhance the meanings that autonomy may not take in diverse educational settings Although from
 different angles the chapters highlight the central role of teacher and learner development as interrelated aspects of
 pedagogy for autonomy in language education
