Consumer Informatics Applications And Strategies In Cyber Health Care:

Consumer Informatics Rosemary Nelson, Marion J. Ball, 2013-03-09 This series is directed to healthcare professionals who are leading the transformation of health care by using information and knowledge Launched in 1988 as *Computers in Health Care* the series offers a broad range of titles some addressed to specific professions such as nursing medicine and health administration others to special areas of practice such as trauma and radiology Still other books in the series focus on interdisciplinary issues such as the computer based patient record electronic health records and networked healthcare systems Renamed *Health Informatics* in 1998 to reflect the rapid evolution in the discipline now known as health informatics the series will continue to add titles that contribute to the evolution of the field In the series eminent experts serving as editors or authors offer their accounts of innovations in health informatics Increasingly these accounts go beyond hardware and software to address the role of information in influencing the transformation of healthcare delivery systems around the world The series also increasingly focuses on peopleware and the organizational behavioral and societal changes that accompany the diffusion of information technology in health services environments

Developments in Healthcare Information Systems and Technologies: Models and Methods Tan, Joseph, 2010-07-31 *Developments in Healthcare Information Systems and Technologies: Models and Methods* presents the latest research in healthcare information systems design development and deployment benefiting researchers practitioners and students Contributions investigate topics such as clinical education electronic medical records clinical decision support systems and IT adoption in healthcare

EHealth Bernd Blobel, Peter Pharow, Michael Nerlich, 2008 Current demographic economic and social conditions which developed countries are faced with require a paradigm change for delivering high quality and efficient health services In that context healthcare systems have to turn from organization centered to process oriented and finally towards individualized patient care also called personal care based on ehealth platform services Interoperability requirements for ubiquitous personalized health services reach beyond current concepts of health information integration among professional stakeholders and related Electronic Patient Records Future personal health platforms particularly have to maintain semantic interoperability among systems using different modalities and technologies different knowledge representation and domain experts languages as well as different coding schemes and terminologies to include home care as well as personal and mobile systems This development is not restricted to regions or countries but appears globally requiring a comprehensive international collaboration This publication within the series *Studies in Health Technology and Informatics* presents papers from leading international experts representing all domains involved in ehealth

Evaluating the Organizational Impact of Health Care Information Systems James G. Anderson, Carolyn Aydin, 2005-10-07 Innovative 2nd edition heavily updated and revised from the 1st edition Introduction to various survey and evaluation methods involving IT systems in the healthcare setting Critical overview of current research in health and social sciences Emphasizes multi method approach to system

evaluation Includes instruments suitable for research and evaluation Discusses computer programs for data analysis and evaluation resources Essential reference for anyone involved in planning developing implementing utilizing evaluating or studying computer based health care systems Consumer-Centered Computer-Supported Care for Healthy People H.-A. Park,P.J. Murray,C. Delaney,2006-06 Intended for nurses and informatics experts working with informatics applications in nursing care administration research and education This book s theme Consumer Centered Computer Supported Care for Healthy People emphasizes the central role of the consumer and the function of information technology in health care

Consumer Health Informatics Applications U. S. Department of Health and Human Services,Agency for Healthcare Research and Quality,2013-05-17 Interest is emerging concerning the potential of technology and eHealth solutions that are tailored to consumers This emerging field has been referred to as consumer health informatics CHI It has been defined by Eysenbach as a branch of medical informatics that analyzes consumers needs for information studies and implements methods of making information accessible to consumers and models and integrates consumers preferences into medical information systems For the purpose of this review we define CHI applications as any electronic tool technology or system that is 1 primarily designed to interact with health information users or consumers and 2 interacts directly with the consumer who provides personal health information to the CHI system and receives personalized health information from the tool application or system and 3 is one in which the data information recommendations or other benefits provided to the consumer may be used with a healthcare professional but is not dependent on a healthcare professional As such for the purposes of this review we have excluded point of care devices e g glucometer remote monitoring devices prescribed clinical

devices that are part of the provision of clinical care general information websites message boards and applications that are designed for use in a work environment This definition has the following advantages 1 It keeps the focus of the review on how CHI applications meet the needs of consumers rather than the needs of clinicians 2 It helps avoid a categorical disease oriented evaluation of every clinical technological development for every disease which is not necessarily focused on the needs of consumers 3 It helps to keep the focus of the review on studies that demonstrate impact value or efficacy from the perspective of consumers 4 It facilitates categorization of CHI applications in ways that may be more meaningful for patients

Potential categories of CHI tools technologies applications include but may not be limited to a Applications and technologies that facilitate knowing tracking understanding clinical parameters disease management b Applications and technologies that facilitate knowing tracking understanding observations of daily living ODL s c Applications and technologies that facilitate calendaring lifestyle management assistance d Applications and technologies that facilitate prevention and health promotion e Applications and technologies that facilitate self care and f Applications and technologies that facilitate assisted care and caregiving

The objective of the report is to review the literature on the evidence of the impact of currently developed CHI applications on health and health care process outcomes to identify the gaps in the literature and to recommend future research endeavors to better assess these information technology IT applications

The specific Key Questions were 1 What evidence exists that CHI applications impact a Health care process outcomes e g receiving appropriate treatment among users b Intermediate health outcomes e g self management health knowledge and health behaviors among users c Relationship centered outcomes e g shared decision making or clinician patient communication among users d Clinical outcomes including quality of life among users e Economic outcomes e g cost and access to care among users 2 What are the barriers that clinicians developers and consumers and their families or caregivers encounter that limit utilization or implementation of CHI applications 3 What knowledge or evidence exists to support estimates of cost benefit and net value with regard to CHI applications 4 What critical information regarding the impact of CHI applications is needed in order to give consumers their families clinicians and developers a clear understanding of the value proposition particular to them

Consumer Informatics and Digital Health Margo Edmunds, Christopher Hass, Erin Holve, 2019-01-17 This unique collection synthesizes insights and evidence from innovators in consumer informatics and highlights the technical behavioral social and policy issues driving digital health today and in the foreseeable future Consumer Informatics and Digital Health presents the fundamentals of mobile health reviews the evidence for consumer technology as a driver of health behavior change and examines user experience and real world technology design challenges and successes Additionally it identifies key considerations for successfully engaging consumers in their own care considers the ethics of using personal health information in research and outlines implications for health system redesign The editors integrative systems approach heralds a future of technological advances tempered by best practices drawn from today s critical policy goals of patient

engagement community health promotion and health equity Here s the inside view of consumer health informatics and key digital fields that students and professionals will find inspiring informative and thought provoking Included among the topics Healthcare social media for consumer informatics Understanding usability accessibility and human centered design principles Understanding the fundamentals of design for motivation and behavior change Digital tools for parents innovations in pediatric urgent care Behavioral medicine and informatics in the cancer community Content strategy writing for health consumers on the web Open science and the future of data analytics Digital approaches to engage consumers in value based purchasing Consumer Informatics and Digital Health takes an expansive view of the fields influencing consumer informatics and offers practical case based guidance for a broad range of audiences including students educators researchers journalists and policymakers interested in biomedical informatics mobile health information science and population health It has as much to offer readers in clinical fields such as medicine nursing and psychology as it does to those engaged in digital pursuits

Consumer Health Informatics Thomas Wetter,2015-08-11 This book offers demographic analysis client appraisal trial design etc along with many examples to inform the conception and critical evaluation of consumer health informatics services Patient safety legal and ethical appraisal and business models add to the systematic coverage Regarding longevity and increase of chronic diseases traditional medical care faces tremendous financial and human resource problems Is self service medicine as follow up of traditional care or as an approach in its own right the answer Are internet and app stores the place where self service medicine takes place The book distinguishes stages of such an endeavour

Consumer Health Informatics Deborah Lewis,Gunther Eysenbach,Rita Kukafka,P. Zoe Stavri,Holly Jimison,2006-03-30 Edited by five leaders in the field of health informatics Consumer Health Informatics explores all aspects of this evolving science This comprehensive volume will be an indispensable tool for both professionals and students as it details the broad scope of consumer health informatics and its impact on today s progressive and ever changing world of health care The inclusion of several case studies serves to examine pertinent topics namely computer based information for cancer National Library of Medicine initiatives and web based patient preferences and utilities Designed for use by medical IT specialists physicians nurses healthcare providers and professors and students of medical informatics the book s chapter highlights include patient empowerment frameworks and models for health behavior change and patient education patient to patient communication patient to provider communication privacy and confidentiality ethical issues evaluation methods and more
