## **Consumption Jobs And The Environment:**

**Consumption, Jobs and the Environment** R. Carr-Hill, J. Lintott, 2002-11-26 Consumption Jobs and the Environment argues that the present pattern of development based on everlasting economic growth is completely unsatisfactory from a welfare point of view. It threatens ecological catastrophe while perpetuating poverty. Roy Carr Hill and John Lintott propose an alternative policy framework based explicitly on welfare and suggest where cuts in consumption, working hours, and ecological risks might be made most usefully.

Climate Politics and the Climate Movement in Australia Hans A. Baer, Verity Burgmann, 2012-06-15 Climate change is the hottest topic of the twenty first century and the climate movement a significant global social movement. This book examines the broad context of Australian climate politics and the place of the climate movement within it. Acting from above are the most powerful forces: corporations and governments. Both Labor and Coalition with the media framing the issues. Climate movement actors in the middle include the Australian Greens, major environmental and climate organisations, public intellectuals, think tanks, academics, and the union movement. Acting from below are the numerous local climate action groups and various regional and national networks. This lowest level is the primary location of the climate movement and grassroots mobilisation, the source of its vitality. Burgmann and Baer's study offers a vision for an alternative Australia based upon the principles of social equity and environmental sustainability.

**Growth in Transition** Friedrich Hinterberger, Elke Pirgmaier, Elisabeth Freytag, Martina Schuster, 2013-03-01 Stimulating growth through adjusting macroeconomic conditions remains the principal policy response to pressing problems of unemployment, poverty, and environmental degradation. However, are the current policy approaches capable of tackling these problems by generating win-win solutions, or are they the root causes of these problems? The current growth trajectory has neither led to a reduction of our overall resource use as we use resources and energy more efficiently, we consume more, nor create the conditions for employment and well-being. Increasingly, there is the realization that it is necessary to make substantial interventions into our national economies and create better framework conditions and incentive systems in order to more widely and rapidly develop and disseminate workable, innovative solutions for realizing sustainable development. This is the task of politics, and the concrete design of the measures must be built upon a broad public debate and shared long-term

visions The authors of this book intend to trigger a dialogue among stakeholders about how we can shape this transformation process towards sustainability Following a detailed presentation of the key arguments for reconsidering the necessary conditions for sustainable economies an international cast of commentators from politics administration civil society business and science engage with the central question is there an alternative trajectory for Western economies that sustains wellbeing whilst confronting ecological and social breakdown
