**Biocultural Diversity Conservation** Luisa Maffi, Ellen

Woodley, 2012-09-10 The field of biocultural diversity is emerging as a dynamic integrative approach to understanding the links between nature and culture and the interrelationships between humans and the environment at scales from the global to the local. Its multifaceted contributions have ranged from theoretical elaborations to mappings of the overlapping distributions of biological and cultural diversity to the development of indicators as tools to measure, assess and monitor the state and trends of biocultural diversity to on the ground implementation in field projects. This book is a unique compendium and analysis of projects from all around the world that take an integrated biocultural approach to sustaining cultures and biodiversity. The 45 projects reviewed exemplify a new focus in conservation: this is based on the emerging realization that protecting and restoring biodiversity and maintaining and revitalizing cultural diversity and cultural vitality are intimately indeed inextricably interrelated. ## **Introduction to Controlled Vocabularies**

Patricia Harpring, 2010-04-13 This detailed book is a how to guide to building controlled vocabulary tools, cataloging and indexing cultural materials with terms and names from controlled vocabularies and using vocabularies in search engines and databases to enhance discovery and retrieval online. Also covered are the following: What are controlled vocabularies and why are they useful? Which vocabularies exist for cataloging art and cultural objects? How should they be integrated in a cataloging system? How should they be used for indexing and for retrieval? How should an institution construct a local authority file? The links in a controlled vocabulary ensure that relationships are defined and maintained for both cataloging and retrieval, clarifying whether a rose window and a Catherine wheel are the same thing or how pot metal glass is related to the more general term stained glass. The book provides organizations and individuals with a practical tool for creating and implementing vocabularies as reference tools, sources of documentation and powerful enhancements for online searching.
