Porter, 1999 Distinguished international scholars examine the neglected issue of the body and its status in classical antiquity **Constructions of the Classical Body** James I. Porter, 1999 Distinguished international scholars examine the neglected issue of the body and its status in classical antiquity

*Constructions of the Classical Body* James I. Porter, 2025-12-10 Classical scholarship has traditionally neglected the prominence of the body in antiquity *Constructions of the Classical Body* theorizes that the study of antiquity is necessarily a study of the body and that attention to this fact can lead to a much needed shift in the way in which classical studies are approached today This volume aims to reestablish the relevance of the problem of the body at the perimeters of several different kinds of inquiry and in this way to help open up a field of possibilities for future study The range covered by the essays in this volume is sweeping from Corinthian vaseware to Athenian and Roman politics poetry from Homer to Ovid medical writers from the Hippocratic corpus to the diary of Aelius Aristides second century c e philosophy Seneca Porphyry the Greek novel Christian apocrypha Ovid s medieval reception and twentieth century film This range is a consequence of the multidisciplinary that any study of the body requires and it attests to the particular richness of the body in classical antiquity and as an object for study today The volume illustrates that body is located between traditional borders not within them the body dissolves traditional objects of study and joins areas usually kept apart Retracing the fate of the body is thus a way of rendering antiquity truly strange again it allows us to see the past afresh with open eyes This volume includes essays by Carlin A Barton Anne Carlson Eric Downing Catherine Edwards Maud W Gleason John Henderson Ralph Hexter S C Humphreys Helen King Leslie Kurke Robert Lamberton David S Potter Amy Richlin Giulia Sissa Maria Wyke and Froma I Zeitlin along with an introduction by James I Porter a superb collection one that I know will be most welcome not only in the field of classical studies but in the libraries of all those interested in the history and historicity of the body Page duBois University of California San Diego **Constructions of the Classical Body** International Association for Philosophy and Literature. **Masonry Construction** C.R. Calladine, 2013-03-09 This volume contains eight contributions on the common theme of masonry construction The publication coincides with the retirement of Dr Jacques Heyman from his Professorship of Engineering in the University of Cambridge and Headship of the University's Engineering Department It is entirely appropriate to have a collection of papers in honour of Professor Heyman at this time for he has made signal contributions to our understanding of masonry construction over the past thirty years or so It is no exaggeration to say that he has radically

changed the way in which engineers think about masonry structures particularly in relation to the old ecclesiastical buildings and bridges Indeed it is hard to imagine what this subject would be like today in the absence of Professor Heyman's seminal papers
