Consuming The American Landscape:

Consuming the American Landscape John Ganis, 2003 Using highly detailed color photographs John Ganis has chronicled the effects of development and extraction industries in every region of the Continental United States over a period of seventeen years The subjects of Ganis s images are for the most part flagrantly clear abandoned wrecks desolate strip mines clear cut forests industrial parks landfill sites and the flattening of terrain for housing developments and just as flagrantly disturbing This is a thesaurus of our civilized incursions into the wildness of nature a charting of our debris strewn topographies and a cogent report on our abdication of any reverence towards the land In an introductory essay Robert Sobieszek from Los Angeles County Museum gives an insightful overview of the historical responses to the American landscape and places the work of John Ganis within the context of the new American pastoral In 1989 Ganis entered into a collaborative exchange with the noted anthropologist Dr Stanley Diamond who wrote the poetry for this book in response to John Ganis s photographs They represent some of his last and previously unpublished poetic work John Ganis established his reputation with work on important environmental issues His color photographs of land use in America have been exhibited widely and are in the collections of The Brooklyn Museum of Art The Center for Creative Photography The Detroit Institute of Arts The San Francisco Museum of Modern Art etc He is currently professor and photography department chair at the College for Creative Studies in Detroit

The Making of the American Landscape Michael P. Conzen, 2014-06-03 The only compact yet comprehensive survey of environmental and cultural forces that have shaped the

visual character and geographical diversity of the settled American landscape The book examines the large scale historical influences that have molded the varied human adaptation of the continent s physical topography to its needs over more than 500 years It presents a synoptic view of myriad historical processes working together or in conflict and illustrates them through their survival in or disappearance from the everyday landscapes of today [Eating Promiscuously](#) James McWilliams,2017-05-01 A bold and bracing argument for the complete reimagining of the human diet by the critically acclaimed author of Just Food The human practice of farming food has failed There are 7 500 known varieties of domesticated apples we regularly eat about five Seventy five percent of the world s food derives from five animals and twelve plants Factory farmed meat is a major source of greenhouse gas emissions about 14 percent larger than transportation and consumes 75 percent of the water in drought prone regions such as the West We are struck in a rut of limited choices ad the vast majority of what we eat is detrimental to our health and the welfare of the planet But what if we could eliminate agriculture as we know it What if we could start over James McWilliams s search for more expansive palate leads him to those who are actively exploring the fringes of what we can eat a group of outliers seeking nutrition innovation outside the industrial food system Here we meet insect manufacturers seaweed harvesters road kill foragers plant biologists and oyster farmers who seek to open both our minds and our mouths and to overturn our most basic assumptions about food health and ethics Eating Promiscuously generates hope for a more tasteful future one in which we eat thousands of foods rather than dozens with a new philosophy that could save both ourselves and our planet **Devouring Cultures** Cammie M. Sublette,Jennifer Martin,2016-01-01 Funded in part by The Julia Child Foundation for Gastronomy and the Culinary Arts Page 4 of cover **Eating Animals in the Early Modern Atlantic World** Danielle Alesi,2025-10-01 This book examines how the perceived edibility of animals evolved during the colonization of the Americas Early European colonizers ate a variety of animals in the Americas motivated by factors like curiosity starvation and diplomacy As settlements increased and became more sustainable constructs of edibility shifted and the colonial food system evolved accordingly By exploring the changes in animal edibility identifiable in early modern Spanish French and English sources in the regions of Mesoamerica Greater Amazonia and the east coast of North America this book shows that animals foodways and settler colonialism are inextricably linked and that the colonization of the Americas was not only the beginning of new empires but also of a long lasting colonial food culture that drives both food systems and human animal relationships to the present day **Are We There Yet?** Susan Sessions Rugh,2008 An entertaining cultural history of the American family vacation during the height of its popularity from 1945 to 1973 Reveals the ways in which the ritual of the family road trip for most middle class Americans became a way of defining what it meant to be and become American [Geography, History, and the American Political Economy](#) John Heppen,2009-08-16 This collection takes on the call issued by reviewers of The American Way for a critical application of Carville Earle s framework to more geographical examples of political and economic shifts in America s past The essays

illustrate changes in U S settlement development and political structure through the lens of the restructuring of the American economy and society over approximately fifty year cycles of crisis and recovery They demonstrate the extension of American s sphere of influence outside of the United States as a larger scalar shift and they underscore the utility of geography in answering very local questions concerning questions of poorly documented settlement histories Focusing on the geographic responses to periodic cycles of crisis and recovery and the more general underlying intertwining of geography and history Geography History and the American Political Economy is an incisive demonstration of how the constant restructuring of American politics and economy occurs within spatial and historical constructs Ag ,2004

Nye,2007 This volume celebrates the 40th anniversary of the journal American Studies in Scandinavia which began publication in 1967 The first of a series of books that will bring together the distinctive scholarship of the Nordic Association for American Studies it situates Scandinavian practices in relation to American Studies debates inside the US where for a decade scholars argued about the shape and subject matter of the field Is this a crisis in American Studies as a whole Or is the problem largely confined to the United States How is this interdisciplinary activity different in a Scandinavian context These questions ultimately are about the field s direction and international coherence Beyond the crisis in US American Studies is an invitation to develop a dialogue across the Atlantic For too long European scholars have watched Americanists in the United States as though looking through a one way window invisible to those arguing on the other side of the glass For too long US Americanists have scarcely realized that what appeared a mirror could be a window **BOOK JACKET** **Affluenza** John de Graaf,David Wann,Thomas H.
