R., Thanigaivelan, M., Suchithra, S., Kaliappan, T., Mothilal, 2024-07-23 In the field of engineering optimization and decision  
making have become pivotal concerns The ever increasing demand for data processing has given rise to issues such as  
extended processing times and escalated memory utilization posing formidable obstacles across various engineering domains  
Problems persist requiring not only solutions but advancements beyond existing best practices Creating and implementing  
novel heuristic algorithms is a time intensive process yet the imperative to do so remains strong driven by the potential to  
significantly lower computational costs even with marginal improvements This book titled Metaheuristics Algorithm and  
Optimization of Engineering and Complex Systems is a beacon of innovation in this context It examines the critical need for  
inventive algorithmic solutions exploring hyperheuristic approaches that offer solutions such as automating search spaces  
through integrated heuristics Designed to cater to a broad audience this book is a valuable resource for both novice and  
experienced dynamic optimization practitioners By addressing the spectrum of theory and practice as well as discrete versus  
continuous dynamic optimization it becomes an indispensable reference in a captivating and emerging field With a deliberate  
focus on inclusivity the book is poised to benefit anyone with an interest in staying abreast of the latest developments in
