A Grand Design:

Explorations and Proposals toward Market Socialism and World Government James A. Yunker, 2022-09-26 This book blends real world history intellectual history and personal history into a compelling case for a new way of thinking about such highly controversial and highly misunderstood concepts as market socialism a Global Marshall Plan and world government It argues that if properly designed according to clear and specific blueprints all three of these possibilities would indeed greatly benefit humanity if they were fully implemented The book puts a human face on these proposals by documenting their origin and development through a detailed account of the author s professional efforts over a long and productive academic career This story of steadfast determination in the face of steep odds will resonate deeply with every person who has nourished a vision that is commonly dismissed as excessively idealistic and unrealistic *The Globalization of NATO* Veronica M. Kitchen, 2010-04-13 This book examines NATO s transition from a Cold War mutual defence organization into a global alliance and puts the recent crisis over the Afghanistan mission in the context of long standing debates over out of area interventions Originally NATO bound the western allies together for the purposes of mutual defence as defined by Article 5 of the North Atlantic Treaty which declared that an attack on the territory of one ally was to be considered an attack on them all However Article 4 of the Treaty invites the allies to consult with each other on a less formal basis whenever their territorial integrity political independence or security was threatened without the automatic commitment to a shared response During the Cold War the allies consulted both formally and informally on issues beyond mutual defence in debates that were more often than not extremely contentious After the Cold War these out of area missions became the primary focus of NATO s military missions The allies had to debate the scope of co operation for every mission they considered undertaking collectively This book argues that NATO s identity has changed from a Cold War mutual defence organization to a global alliance in the course of debates over how to respond to the changing circumstances of its security environment This book will be of much interest to students of security studies international organisations contemporary history and IR in general **The New Cambridge Medieval History: Volume 1, C.500-c.700** Paul Fouracre, Rosamond McKitterick, David Abulafia, 1995 Sample Text **Computerworld**, 1991-09-02 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **Selected Papers Of C C Lin With Commentary (In 2 Volumes)** Yuan Chi, David J Benney, Frank H Shu, 1987-08-01 One of the most prolific applied mathematicians of the mid twentieth century Prof Lin is a highly respected professor at MIT These volumes a collection of Prof Lin s papers from 1943 to 1986 is an attempt to exhibit a historical perception of the development of ideas in the following areas of research Stability of Parallel Flows Turbulence Spiral Structure of Galaxies Prof Lin has written short comments and personal recollections on
