**Gifts of Clothing in Late Antique Literature** Nikki Rollason, 2016-07-15 Both clothing and gifts in the ancient world have separately been the subject of much scholarly discussion because they were an integral part of Greek and Roman society and identity creating and reinforcing the relationships which kept a community together as well as delineating status and even symbolising society as a whole They have however rarely been studied together despite the prevalence of clothing gifts in many ancient texts This book addresses a gap in scholarship by focusing on gifts of elite male clothing in late antique literature in order to show that when they appeared in texts these items were not only functioning in an historical or real life sphere but also as a literary space within which authors could discuss ideas of social relationships and authority This book suggests that authors used items which usually formed part of the costume of authority of the period the trabea of the consul the chlamys of the imperial court and the emperor and the pallium of the Christian bishops to over write wearers and donors as confident figures of official authority when this may have been open to doubt

The Enigma of Money Makoto Nishibe, 2016-10-24 This book provides a new way of understanding modern money and markets by stressing their self fulfilling self destructive

properties as institutions from evolutionary perspectives In contrast to an unrealistic view of the neoclassical general equilibrium theory that models the price mechanism of a concentrated market without using money presented here is an alternative theory of markets on how a realistic dispersive market using a stock of money and inventory as buffers can work as a multilayered price quantitative adjustment system The central features of modern sovereign moneys seen in inconvertible IOUs of central banknotes can be depicted as The Emperor s New Clothes that correspond to the U S dollar and the Euro void of their own value The image captures such characteristics of national currencies as self fulfilling ideas by the inertia of conventions in the past and expectations of an uncertain future Both ideas normally make money more acceptable and circulative so that its value can become more stable unless expectations for the future turn very pessimistic The same logic also applies to such other currencies as Bitcoin and community currencies Their recent diffusion has shown that Hayek s idea of denationalization of money and competition between multiple currencies in terms of its qualities not its quantities sought as in ongoing quantitative easing become more relevant under current situations The qualities of money refer not only to stable monetary values and low transaction costs but also to high ability in creating sharing and communicating social and cultural value The potential of the logic of self fulfillment of ideas can thus open up a new economic society when we realize that such various non national currencies all depend on the same logic of money *Byzantine Art and Archaeology* Ormonde Maddock Dalton,1911 **San Toy, Or, The Emperor's Own** Sidney Jones,1899 Fortune Henry R.
