British Social Attitudes Roger Jowell, 1992 Britain is on the whole a well documented nation We

know or are able to find out a great deal about our characteristics as a society who we are and what we do But we know much less about our character what we think about our world and ourselves Very little systematic material is publicly available on the nation's values whether or how they have been changing and the extent to which different sections of the population vary in their attitudes and beliefs British Social Attitudes compiles describes and comments upon a wide range of current social attitudes The information is obtained from around 3000 interviews carried out by SCPR among a nationwide sample sample in an annual series of surveys The series seeks to chart changes in British social values during the 1980s and 1990s in relation to other changes in society and is core funded by the Sainsbury Family Charitable Trusts Reception of Northrop Frye, 2021-09-23 The Reception of Northrop Frye takes a thorough accounting of the presence of Frye in existing works and argues against Frye's diminishing status as an important critical voice *Communes and the Green Vision* David Pepper, 1991 Description currently unavailable Viewpoints in Travel Josephine Adams Rathbone, 1919

historical writing and urges a re evaluation of the dialectical method      Urban Design Cliff Moughtin,1996 The subject matter of this book is the pattern or structure of the city it concentrates particularly upon the organization of the public realm The book aims to relate the main components of urban design to a general theory or urban structuring with a strong design emphasis but within the general field of sustainable city development There is some doubt about the long term survival of the planet as a vehicle for sustained human occupation in anything other than a degraded lifestyle Any discussion of urban design which does not address environmental issues has little meaning at a time of declining natural resources ozone layer destruction and fears of the greenhouse effect The book therefore discusses built form street block quarter and city structure in terms of energy conservation and sustainability      *The Source Book* William Francis Rocheleau,1926
