

Guiding Principles in the Selection and Use of Instructional Materials

Instructional Material and its Kinds

Instructional Materials

1. WHAT ARE INSTRUCTIONAL MATERIALS?

Devices that assist an instructor in the teaching- learning process. These are materials that are used to aid in the transference of information from one to another.

Instructional aids are not self-supporting; they are supplementary training devices. The key factor is that instructional aids support, supplement, or reinforce.

**WHEN DO WE USED INSTRUCTIONAL MATERIALS? -
YOU USE INSTRUCTIONAL MATERIALS WHEN YOU TEACH SOMETHING. EX. BOOKS, CHARTS,
GRAPHS, PICTURES, WORKSHEETS, AUDIO CDS/DVDS, VIDEOS**

For many years, educators have theorized about how the human brain and the memory function during the communicative process. There is general agreement about certain theoretical factors that seem pertinent to understanding the use of instructional aids.

INSTRUCTIONAL AID THEORY

•During the communicative process, the sensory register of the memory acts as a filter. As stimuli are received, the individual's sensory register works to sort out the important bits of information from the routine or less significant bits. Within seconds, what is perceived as the most important information is passed to the working or short-term memory where it is processed for possible storage in the long-term memory. This complex process is enhanced by the use of appropriate instructional aids that highlight and emphasize the main points or concepts.

•The working or short-term memory functions are limited by both time and capacity. Therefore, it is essential that the information be arranged in useful bits or chunks for effective coding, rehearsal, or recording. The effectiveness of the instructional aid is critical for this process. Carefully selected charts, graphs, pictures, or other well-organized visual aids are examples of items that help the student understand, as well as retain, essential information.

•Ideally, instructional aids should be designed to cover the key points and concepts. In addition, the coverage should be straightforward and factual so it is easy for students to remember and recall. Generally, instructional aids that are relatively simple are best suited for this purpose.

REASONS FOR USE OF IMS

1. It helps the students remember important information.
2. When properly used, they help gain and hold the attention of students.
3. Audio or visual aids can be very useful in supporting a topic, and the combination of both audio and visual stimuli is particularly effective since the two most important senses are involved. Instructors should keep in mind that they often are salesmen of ideas, and many of the best sales techniques that attract the attention of potential clients are well worth considering. One caution-the instructional aid should keep student attention on the subject; it should not be a distracting gimmick.
4. Good instructional aids also can help solve certain language barrier problems. Consider the continued expansion of technical terminology in everyday usage. This, coupled with culturally diverse backgrounds of today's students, makes it necessary for instructors to be precise in their choice of terminology. Words or terms used in an instructional aid should be carefully selected to convey the same meaning for the student as they do for the instructor. They should provide an accurate visual image and make learning easier for the student.
5. Another use for instructional aids is to clarify the relationships between material objects and concepts. When relationships are presented visually, they often are much easier to understand. For example, the subsystems within a physical unit are relatively easy to relate to each other through the use of schematics or diagrams. Symbols, graphs, and diagrams can also show relationships of location, size, time, frequency, and value. By symbolizing the factors involved, it is even possible to visualize abstract relationships.

REASONS FOR USE OF IMS

To encourage your student in their lesson and get their attention improve the delivery of instruction Creation of effective, meaningful lessons Helps students make sense of information Instructional Materials serve as the channel between the teacher and the students in delivering the instruction. For learners have a clear view of what is being taught. Importance of IMs
