Noe, 2020-10-07 Finalist for the Lincoln Prize Winner of the Colonel Richard W Ulbrich Memorial Book Award Traditional  
histories of the Civil War describe the conflict as a war between North and South Kenneth W Noe suggests it should instead  
be understood as a war between the North the South and the weather In *The Howling Storm* Noe retells the history of the  
conflagration with a focus on the ways in which weather and climate shaped the outcomes of battles and campaigns He  
further contends that events such as floods and droughts affecting the Confederate home front constricted soldiers food  
supply lowered morale and undercut the government s efforts to boost nationalist sentiment By contrast the superior  
equipment and open supply lines enjoyed by Union soldiers enabled them to cope successfully with the South s extreme  
conditions and ultimately secure victory in 1865 Climate conditions during the war proved unusual as irregular phenomena  
such as El Ni o La Ni a and similar oscillations in the Atlantic Ocean disrupted weather patterns across southern states  
Taking into account these meteorological events Noe rethinks conventional explanations of battlefield victories and losses  
compelling historians to reconsider long held conclusions about the war Unlike past studies that fault inflation taxation and  
logistical problems for the Confederate defeat his work considers how soldiers and civilians dealt with floods and droughts  
that beset areas of the South in 1862 1863 and 1864 In doing so he addresses the foundational causes that forced Richmond

to make difficult and sometimes disastrous decisions when prioritizing the feeding of the home front or the front lines The Howling Storm stands as the first comprehensive examination of weather and climate during the Civil War Its approach coverage and conclusions are certain to reshape the field of Civil War studies *1200 Treasure Books* Jesse Ed Rascoe,1970
