A Guide For The Perplexed:

A Guide for the Perplexed Moses Maimonides, 1984-06-01 *Kabbalah: A Guide for the Perplexed* Pinchas Giller, 2011-10-27 Kabbalah A Guide for the Perplexed is a concise and accessible introduction to the major elements of the prevalent metaphysical system of Judaism Kabbalah The book covers the historical and theoretical essence of Kabbalah offering a clear definition of the term and the limitations of what Kabbalah is and is not Pinchas Giller provides an overview of the history of the movement reflecting the sweep of Jewish history as a whole and examines its metaphysical system the advanced mythos of early and later Luria doctrines of the soul and the mysteries of Jewish religious practice and law The book concludes with a summary of the contemporary kabbalistic phenomena particularly in light of the notoriety of some modern purveyors of Kabbalah As cogent and objective as possible this is the ideal companion for those wishing to gain a sound understanding of this often perplexing mystical aspect of Judaism

Guide for the Perplexed Moses Maimonides, This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1919 edition Excerpt Aristotle could not have considered them conclusive after having himself taught us the rules of logic and the means by which arguments can be refuted or confirmed The reason why I have introduced this subject is this Later philosophers disciples of Aristotle assume that he has proved the Eternity of the Universe and most of those who believe that they are philosophers blindly follow him in this point and accept all his arguments as conclusive and absolute proofs They consider it wrong to differ from Aristotle or to think that he was ignorant or mistaken in anything For this reason taking their standpoint I show that Aristotle himself did not claim to have proved the Eternity of the Universe He says in his book *Physics* viii chap i as follows All the Physicists before us believed that motion is eternal except Plato who holds that motion is transient according to his opinion the heavens are likewise transient Now if Aristotle had conclusive proofs for his theory he would not have considered it necessary to support it by citing the opinions of preceding Physicists nor would he have found it necessary to point out the folly and absurdity of his opponents For a truth once established by proof does neither gain force nor certainty by the consent of all scholars nor lose by the general dissent We further find that Aristotle in the book *The Heavens and the World* introduces his theory of the Eternity of the Universe in the following manner Let us inquire into the nature of the heavens and see whether they are the product of something or not destructible or not After this statement of the problem he proceeds to cite the views of those who hold that the heavens have had a beginning and [A Guide for the Perplexed](#) Ernst Friedrich Schumacher, 1978

GUIDE FOR THE PERPLEXED E. F.
