The Lives of the Neutron Stars M. A. Alpar,Ü Kızılođlu,Jan van Paradijs,1995 This NATO AS was the third in the series of Advanced Study Institutes on neutron stars which started with Timing Neutron Stars held in Qe me near izmir Turkey April 1988 followed by Neutron Stars an Interdis ciplinary Subject held in Agia Pelagia on the island of Crete September 1990 The first school centered on our main observational access to neu tron stars i e the timing of radio pulsars and accretion powered neutron

stars and on what timing of neutron stars teaches us of their structure and environment The second school had as its theme the interplay between diverse areas of physics which find interesting even exotic applications in the extreme conditions of neutron stars and their magnetospheres As the field has developed with the number of observed neutron stars rapidly increasing and our knowledge of many individual neutron stars getting deeper and more detailed an evolutionary picture of neutron stars has started to emerge This led us to choose *The Lives of the Neutron Stars* as the unifying theme of this third Advanced Study Institute on neutron stars Different types of neutron star activity have been proposed to follow one another in stages during the lives of neutron stars in the same basic population the evolutionary connection between low mass X ray binaries and millisecond radio pulsars is perhaps the prime example

Isolated Pulsars K. A. van Riper, R. Epstein, Cheng Ho, 1993-03-25 The extreme properties of pulsars demand a broad range of physics From The Los Alamos Workshop on Isolated Pulsars contributions have been selected to encompass all aspects of pulsar detection and understanding Recent observational highlights include results from the Compton Gamma Ray Observatory ROSAT and GINGA and the Hubble Space Telescope Well illustrated theoretical contributions cover a wide range of topics This volume forms a comprehensive and up to date guide to the observation and theory of solitary neutron stars
