**Power, Legal Education, and Law School Cultures** Meera Deo, Mindie Lazarus-Black, Elizabeth Mertz, 2019-10-10

There is a myth that lingers around legal education in many democracies That myth would have us believe that law students are admitted and then succeed based on raw merit and that law schools are neutral settings in which professors also selected and promoted based on merit use their expertise to train those students to become lawyers Based on original empirical research this book investigates this myth from myriad perspectives diverse settings and in different nations revealing that hierarchies of power and cultural norms shape and maintain inequities in legal education Embedded within law school cultures are assumptions that also stymie efforts at reform The book examines hidden pedagogical messages showing how presumptions about theory s relation to practice are refracted through the obfuscating lens of curricula The contributors also tackle questions of class and market as they affect law training Finally this collection examines how structural barriers replicate injustice even within institutions representing themselves as democratic and open revealing common dynamics across cultural and institutional forms The chapters speak to similar issues and to one another about the influence of context images of law and lawyers the political economy of legal education and the agency of students and faculty

*Global Context* Christopher Gane,Robin Hui Huang,2017-05-15 This book discusses the opportunities and challenges facing

legal education in the era of globalization It identifies the knowledge and skills that law students will require in order to

prepare for the practice of tomorrow and explores pedagogical shifts legal education needs to make inside and outside of the

classroom With contributions from leading experts on legal education from various jurisdictions across the globe the work

combines theoretical depth with practical insights Seeking to understand the changing landscape of legal education in the

era of globalization the contributions find that law schools can and must adopt educational strategies that at least present

students with different understandings of what studying and practicing law is meant to be about They find that law schools

need to offer their students choices a vision of practice that is not driven entirely by the demands of the marketplace or the

needs of major international law firms Bridging the gap between theory and practice this book makes a significant

contribution to the impact of globalization on legal education and how students and law schools need to adapt for the future
