A Guide To The Collision Avoidance Rules Third Edition:

A Guide to the Collision Avoidance Rules Alfred Norman Cockcroft, J. N. F. Lameijer, 1990 This is the definitive work on the Collision Avoidance Rules for all concerned with the practical and legal aspects of their interpretation This new edition incorporates the 1993 Amendments to the International Regulations for Preventing Collisions at Sea 1972 which came into force in 1995 The book sets out all the Rules with clear comments on their meaning and on the significance of the changes and with excerpts from Court judgements that show how they have been interpreted in law Arrangements of lights and signals are illustrated in colour and diagrams explain certain aspects of the Steering and Sailing Rules

Port State Jurisdiction and the Regulation of International Merchant Shipping Bevan Marten, 2013-08-31 This book examines the concept of port state jurisdiction in the context of international maritime law In particular the book focuses on situations where port states have used their jurisdiction over visiting foreign flagged vessels to apply unilateral domestic law as compared with the internationally agreed standards enforced by regional port state control organisations To illustrate the legal issues involved three recent pieces of legislation are analysed in detail the United States Cruise Vessel Security and Safety Act 2010 the EU s liability insurance directive of 2009 and Australia s Fair Work Act 2009 Key issues include the legality of port states attempts to regulate aspects of a vessel s structure or equipment or even certain activities that may take place before a vessel s arrival in port The author argues that examples of unilateral measures being imposed by way of port state jurisdiction are growing and that without active protests from flag states this concept will continue to expand in scope As international law currently presents very few restrictions on the actions of ambitious port states such developments may have a significant impact on the future of international maritime regulation

Mapping and Spatial Modelling for Navigation Louis F. Pau, 2012-12-06 The successful implementation of applications in spatial reasoning requires paying attention to the representation of spatial data In particular an integrated and uniform treatment of different spatial features is necessary in order to enable the reasoning to proceed quickly Currently the most prevalent features are points rectangles lines regions surfaces and volumes As an example of a reasoning task consider a query of the form find all cities with population in excess of 5 000 in wheat growing regions within 10 miles of the Mississippi River Note that this query is quite complex It requires processing a line map for the river creating a corridor or buffer to find the area within 10 miles of the river a region map for the wheat and a point map for the cities Spatial reasoning is eased by spatially sorting the data i e a spatial index In this paper we show how hierarchical data structures can be used to facilitate this process They are based on the principle of recursive decomposition similar to divide and conquer methods In essence they are used primarily as devices to sort data of more than one dimension and different spatial types The term quadtree is often used to describe this class of data structures In this paper we focus on recent developments in the use of quadtree methods We concentrate primarily on region data For a more extensive treatment of this subject see SameS4a SameSSa SameSSb SameSSc SameSga SameSgbj

Marine Policy Reports ,1981 **The Panama Canal Pilot** George A. Markham,1990 **Vessel Collisions in the Law of the Sea** Alfredo C. Robles Jr.,2022-12-08 This book focuses on the decision of the Tribunal in the South China Sea Arbitration that China had operated its law enforcement vessels in ways that created risks of collision with Philippine official vessels at Scarborough Shoal in April and May 2012 The book explains the International Regulations for Preventing Collisions at Sea COLREGS and the incidents in layperson s terms It analyzes China s violations of the COLREGS on the basis of confidential Philippine documents declassified for the Arbitration technical works by professional mariners and the reports submitted by the navigational safety experts to the Tribunal It pays attention to Chinese post arbitration critiques of the Tribunal s decision which it characterizes as rationalizations of collisions as instruments of Chinese foreign policy It contrasts China s conduct with the practice of the US and Western European States which mandate compliance with collision regulations even during law enforcement operations The book draws on sources in five languages English French German Italian and Spanish and helps the reader understand the pattern of China s harassment of vessels from littoral and non littoral States in the South China Sea as well as the absence of legal foundations for China s rationalizations of its behavior
