The Origin of the Fighter Aircraft Jon Guttman,2017-10-09 From Scouts to Balloon busters the Emergence of Air to Air Combat in World War I When World War I began in August 1914 the airplane had already proven its worth as an intelligence gathering eye in the sky These scouting aircraft soon became indispensable to armies on both sides and the attempt to drive enemy planes away began in earnest Local air superiority was incorporated into battlefield strategy and the use of aircraft to conduct offensive operations would change warfare as dramatically as the first firearms 300 years before By the end of 1915 the basic formula of the armed scout settled on a single seater with a machine gun synchronized to fire through its propeller blades This heavily armed aircraft became the first true fighter plane whose primary function was to destroy enemy aircraft whether scouts balloons bombers or other fighters A new glamorized knight of the air was born the ace a fighter pilot who brought down five or more opponents From 1916 on as the combatants relied on airplanes more flying tactics and strategy including mass formations were developed for what would become a deadly struggle for complete air superiority By 1918 the final year of the war air battles could be as sprawling as those on the ground In *The Origin of the Fighter Aircraft* historian Jon Guttman tells the engrossing story of how one of the most amazing inventions became an integral component of warfare Balancing technical description personalities and battle accounts the author demonstrates that by the end of World War I most of the fundamentals for modern aerial combat had been established

Fighting Firsts Jon Guttman,2000 It is a rare and happy event when a great idea for a book occurs to the man best suited to write it The concept of examining the first time each of scores of new fighters entered combat is so good Guttman lays it out exactly right *Fighting Firsts* is a really fine book a model of its kind and one that can be read straight through Aviation History

[F9F Panther vs Communist AAA](#) Peter E. Davies,2022-06-23 A detailed look at the deadly battle between US Navy F9F Panther jet fighter bombers and communist anti aircraft artillery AAA defenses that proliferated throughout the Korean War The F9F Panther was one of the many fighters converted for ground attack duties following an established US tradition Originally designed as a jet fighter in April 1951 it became the first jet to launch from a carrier with bombs loaded using them to destroy a crucial railway bridge at Songjin The Panther s four 20 mm guns were considered to be very effective for flak suppression and these aircraft were

used as escorts for propeller driven AD Skyraider and F4U Corsair attack aircraft However later in 1951 flak damage to Panthers increased as the Chinese established better AAA weapons to defend key transport routes The communist AAA crews had heavy guns of 37 mm caliber and above Gunners could use optical height finders predictors and in many cases radar control They learned to conceal their weapons in civilian buildings use wires to bring aircraft down and set up false targets as flak traps Both opponents tactics and gunnery are explored in depth in this study of the F9F Panthers and of their adversaries Containing full color illustrations including cockpit scenes and armament views this innovative volume also includes a detailed analysis of the US Navy Panthers loss rates and their causes **Guide to Combat Aircraft** Andrew Kershaw,1981 Traces the brief history of aircraft used in war **The Encyclopedia of the World's Combat Aircraft** Bill Gunston,1976 Oversigt over kampfly fra alle lande hovedsagelig opstillet under p g ldende flyfabrikker i alfabetisk orden
