

The notebook cover features a vibrant illustration of a tropical resort. In the foreground, two young boys are smiling and hugging. Behind them, a boy is jumping into a swimming pool. In the pool, there is a crocodile with a beach ball on its back and a tiger on a log. In the background, an elephant is partially submerged in the water, and a person is riding on its back. A waterfall cascades down a rocky cliff, and a building with a thatched roof is visible. A monkey is perched on a tree branch in the upper right. The scene is set in a lush, green environment with pink flowers.

2014 Regional Convention Notebook For Kids:

Children's Rights Ursula Kilkelly, 2017-07-05 The articles in this volume shed light on some of the major tensions in the field of children's rights such as the ways in which children's best interests and respect for their autonomy can be reconciled challenges such as how the CRC can be made a reality in the lives of children in the face of ignorance apathy or outright opposition and critiques whether children's rights are a Western imposition or a successful global consensus Along the way the writing covers a myriad of issues encompassing the opposition to the CRC in the US gay parenting Dr Seuss's take on children's autonomy the voice of neonates on their health care the role of NGO in supporting child labourers in India and young people in detention and more

Good Kids Isabel Jijon, 2025-07-29 One in ten children worldwide is involved in some form of child labor While almost half are in occupations that put their safety at risk the other half have gray jobs like industrial farming or selling candy on the street Children in these positions often defend the value of their work and some even join social movements to demand the legalization of child labor In Good Kids Isabel Jijon reveals how global campaigns against child labor are often met with resistance from the very children they are meant to protect Conducting interviews in Bolivia and Ecuador with children who defend their work Jijon explores how children give work moral not just economic value She finds that working children seek a sense of self worth as well as worthiness in their closest relationships they use work to prove that they are good sons daughters good friends or simply good kids Drawing also on interviews with reformers invested in ending child labor Jijon produces a nuanced picture of the ways that global campaigns can unintentionally undermine these relationships and make working children feel stigmatized rather than protected This fascinating and challenging study of moral meaning making upends simple understandings of harm and worthiness in a vast but poorly understood labor market

Handbook of Children's Rights Martin D. Ruck, Michele Peterson-Badali, Michael Freeman, 2016-12-08 While the notion of young people as individuals worthy or capable of having rights is of relatively recent origin over the past several decades there has been a substantial increase in both social and political commitment to children's rights as well as a tendency to grant young people some of the rights that were typically accorded only to adults In addition there has been a noticeable shift in orientation from a focus on children's protection and provision to an emphasis on children's participation and self determination With contributions from a wide range of international scholars the Handbook of Children's Rights brings together research theory and practice from diverse perspectives on children's rights This volume constitutes a comprehensive treatment of critical perspectives concerning children's rights in their various forms Its contributions address some of the major scholarly tensions and policy debates comprising the current discourse on children's rights including the best interests of the child evolving capacities of the child states rights versus children's rights rights of children versus parental or family rights children as citizens children's rights versus children's responsibilities and balancing protection and participation In addition to its multidisciplinary focus the handbook includes perspectives from social science domains in

which children's rights scholarship has evolved largely independently due to distinct and seemingly competing assumptions and disciplinary approaches e.g. childhood studies, developmental psychology, sociology of childhood, anthropology and political science. The handbook also brings together diverse methodological approaches to the study of children's rights including both quantitative and qualitative perspectives and policy analysis. This comprehensive, cosmopolitan and timely volume serves as an important reference for both scholarly and policy-driven interest in the voices and perspectives of children and youth.

Reconceptualising Unaccompanied Child Asylum Seekers and the Law Jennifer L.

Whelan, 2022-09-30. Unaccompanied child asylum seekers are amongst the world's most vulnerable populations and their numbers are increasing. The intersection of their age, their seeking asylum and separation from their parents creates a specific and acute triple burden of vulnerability. Their precariousness has long been recognised in international human rights law. Yet human rights-based responses have been subordinated to progressive global securitisation of irregular migration through interception, interdiction, extraterritorial processing and immigration detention. Such an approach necessitates an urgent paradigm shift in how we comprehend their needs as children, the impact of punitive border control laws on them and the responsibility of States to these children when they arrive at their borders seeking asylum. This book reconceptualises the relationship between unaccompanied child asylum seekers and States. It proposes a new conceptual framework by applying international human rights law, childhood studies and vulnerability theory scholarship in analysing State obligations to respond to these children. This framework incorporates a robust analysis of the operation and impact of laws on vulnerable populations, a taxonomy for articulating the gravity of any consequent harms and a method to prioritise recommendations for reform. The book then illustrates the framework's utility using Australia's treatment of unaccompanied children as a case study. This book illuminates key learnings from human rights law, childhood studies and vulnerability theory and transforms them into a new roadmap for law reform. As such, it will be a valuable practice-based resource for practitioners, non-government organisations, advocates, policymakers and the general public interested in advocating for the rights of vulnerable populations, as well as for academics, researchers and students of human rights law, refugee law, childhood studies and vulnerability studies.
