O connor,2006 *AIDS in Africa* Nana Poku,2005 Across Africa HIV AIDS is slowly killing millions of people in the prime of their lives weakening state structures deepening poverty and reversing the gains in life expectancy achieved over the past century Although many who study the dynamics of Africas AIDS crisis accept that to some degree its entrenchment is a socially produced phenomenon few have examined how the course and intensity of the epidemic have been affected by the continents ubiquitous poverty the impact of the pervasive structural adjustment programmes or Africas marginalization in the process of globalization until now This book explores the socio economic context of Africas vulnerability to HIV AIDS as well as assessing the politics of domestic and global response Using primary and secondary data it charts the power relations driving Africas HIV AIDS epidemic frustrating the possibility of alleviation and recovery as well as working to relegate the continent to a bleak and vulnerable future In this sense the book marks a radical departure by providing a comprehensive analysis of Africas vulnerability to AIDS and the challenges confronting policy makers as they seek to reverse its escalating

Challenges of African Growth B. J. Ndulu,2007 Poverty in Africa is largely the outcome of slow growth With the region hosting 10 percent of the world s population but a staggering 30 percent of the world s poor the challenges it faces are enormous but NOT insurmountable The message of this book is clear poverty eradicating development in Africa is possible In fact there are indications that Africa is at a turning point and there is growing momentum among front runner economies in the region toward higher and sustained growth This study challenges African countries and their development partners to consolidate and continue this momentum and to exploit the advantages of the continent as a latecomer particularly in innovation and in drawing lessons from successful export led growth experiences in Asia and Latin America

Challenges of African Growth identifies opportunities constraints and strategic choices that African countries face in their quest for achieving the growth necessary for poverty alleviation More important the study provides a broad menu of stategic options for ensuring not only that countries embark on a growth path but also that the growth is shared and sustainable The critical areas for action rest on four pillars the investment climate infrastructure innovation for increasing productivity and competitiveness and institutional capacity
