Sleeping With Extra-Terrestrials Wendy Kaminer, 2000-10-10 In *Sleeping with Extra Terrestrials* social critic Wendy Kaminer illuminates the various ways in which society has come to value emotion over reason faith over fact and argues that declarations of intense belief have largely taken the place of rational discourse In a world in which How do you feel seems to be a more frequently asked question than What do you know Kaminer's examination of the rise of spiritualism the mushrooming junk science and the habitual merging of political and evangelical speech blazes with relevance and incisive wit Probing the amusing and ominous implications of rampant credulity in our age Kaminer raises important questions and provides a thoughtful and eloquent perspective on the perils of present day irrationalism

Beyond Therapy President's Council on Bioethics (U.S.), 2003-12-02 A groundbreaking new exploration of the promises and perils of biotechnology and the future of American society Biotechnology offers exciting prospects for healing the sick and relieving suffering But because our growing powers also enable alterations in the workings of the body and mind they are becoming attractive to healthy people who would just like to look younger perform better feel happier or become more perfect This landmark book the product of more than sixteen months of research and reflection by the members of the President's Council on Bioethics explores the profound ethical and social consequences of today's biotechnical revolution Almost every week brings news of novel methods for screening genes and testing embryos choosing the sex and modifying the behavior of children enhancing athletic performance slowing aging blunting painful memories brightening mood and altering basic temperaments But we must not neglect the fundamental question Should we be turning to biotechnology to fulfill our deepest human desires We want better children but not by turning procreation into manufacture or by altering their brains to gain them an edge over their peers We want to perform better in the activities of life but not by becoming mere creatures of chemistry We want longer lives but not at the cost of becoming so obsessed with our own longevity that we care little about future generations We want to be happy but not by taking a drug that gives us happy feelings without the genuine loves attachments and achievements that are essential to true human flourishing As we enjoy the benefits of biotechnology members of the council contend we need to hold fast to an account of the human being seen not in material or mechanistic or medical terms but in psychic moral and spiritual ones By grasping the limits of our new powers we can savor the fruits of the age of biotechnology without succumbing to its most dangerous temptations *Beyond Therapy* takes these issues out of the narrow circle of bioethics professionals and into the

larger public arena where matters of this importance rightly belong
