Value-Based Working Capital Management G. Bainbridge, 2013-01-01 In most capital markets, insider trading is the most common violation of securities law. It is also the most well known, inspiring countless movie plots and attracting scholars with a broad range of backgrounds and interests from pure legal doctrine to empirical analysis to complex economic theory. This volume brings together original cutting edge research in these and other areas written by leading experts in insider trading law and economics. The Handbook begins with a section devoted to legal issues surrounding the US's ban on insider trading, which is one of the oldest and most energetically enforced in the world. Using this section as a foundation, contributors go on to discuss several specific court cases as well as important developments in empirical research on the subject. The Handbook concludes with a section devoted to international perspectives providing insight into insider trading laws in China, Japan, Australia, New Zealand, the United Kingdom, and the European Union. This timely and comprehensive volume will appeal to students and professors of law and economics as well as scholars, researchers, and practitioners with an interest in insider trading. Financial Management Timothy J. Gallagher, 2022-03-13 Those who advocate the traditional maximize shareholder value goal of the firm will find that position clearly presented in the 9th edition, in addition to critical arguments for and against it. Those who advocate a multiple stakeholder approach will see that view fairly presented as well, in addition to the criticisms of this approach. The financial effect of the world-wide COVID pandemic is examined in this 9th edition. Both shareholder capitalism and stakeholder capitalism are critically evaluated. Should a company's impact on climate change be considered when corporate decisions are made? If so, is this a matter of self-interest, a desire to also consider the interests of stakeholders who are not shareholders of the firm, or both? The 9th edition addresses these questions. There are special forms of business organization that have an explicit social welfare purpose. We covered the state-chartered benefit corporation and B Lab certified corporation in 8e. In 9e, the low-profit limited liability company (L3C) has been added. Business schools everywhere are emphasizing in their marketing communications their contributions to society. Perhaps your business school has communicated about sustainable business.
