Neoliberalism 2.0: Regulating and Financing Globalizing Markets L. Nijs,2016-01-26 In today s increasingly globalized environment many economic fundamentals need to be reconsidered in order to regain stability in the global marketplace One such consideration is the failing dynamics of the international tax infrastructure Neoliberalism 2 0 brings a 21st century assessment of the Pigovian taxes considering a completely new calibration of the international tax systems inspired by the historically developed Pigovian tax model The book considers the impact neoliberalism had and will have on regulatory infrastructure democracy in an era of globalization and reduced legitimation of the national state The Pigovian model brings home the often forgotten relationship between taxation as a part of the regulatory sphere macro economics and the political philosophical context in which law and economics emerge The model also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies Neoliberalism 2 0 demonstrates the ability to design a paradigm changing alternative to the current tax infrastructure while taking into account a low economic growth environment of the future the implications of globalization and the changing relationship between citizens and their state

World Development Report 2017 World Bank Group,2017-02-02 Why are carefully designed sensible policies too often not adopted or implemented When they are why do they often fail to generate development outcomes such as security growth and equity And why do some bad policies endure World Development Report 2017 Governance and the Law addresses these fundamental questions which are at the heart of development Policy making and policy implementation do not occur in a vacuum Rather they take place in complex political and social settings in which individuals and groups with unequal power

interact within changing rules as they pursue conflicting interests The process of these interactions is what this Report calls governance and the space in which these interactions take place the policy arena The capacity of actors to commit and their willingness to cooperate and coordinate to achieve socially desirable goals are what matter for effectiveness However who bargains who is excluded and what barriers block entry to the policy arena determine the selection and implementation of policies and consequently their impact on development outcomes Exclusion capture and clientelism are manifestations of power asymmetries that lead to failures to achieve security growth and equity The distribution of power in society is partly determined by history Yet there is room for positive change This Report reveals that governance can mitigate even overcome power asymmetries to bring about more effective policy interventions that achieve sustainable improvements in security growth and equity This happens by shifting the incentives of those with power reshaping their preferences in favor of good outcomes and taking into account the interests of previously excluded participants These changes can come about through bargains among elites and greater citizen engagement as well as by international actors supporting rules that strengthen coalitions for reform

Convention National Electric Light Association. Convention,1930 *The effect of Black Economic Empowerment (BEE) on racial inequality in South*

Africa Korbinian Stinglhamer, 2017-10-11 Seminar paper from the year 2016 in the subject Economics Case Scenarios grade 1 0 University of Wisconsin Madison Economics course Economics 477 Economic Development of Africa language English abstract This paper investigates the Black Economic Empowerment BEE program in South Africa and its economic justification by analyzing the trends in both intra and interracial inequality since the implementation of BEE Even though inequality is driven by many different factors this paper attempts to analyze whether BEE was able to effectively reduce inequality in the way that it was intended My findings suggest that BEE might have helped to reduce inequality between different races but that it increased inequality among black people During Apartheid black people were excluded from major parts of South Africa s economy This resulted in an unequal income distribution in South Africa Even after Apartheid ended in 1994 income was distributed unequally between races In order to reduce this inequality and equalize opportunities between the different races in South Africa the government implemented an affirmative action program called Black Economic Empowerment BEE in 2003 In this case and in the following sections the word black defines a racial group including Africans coloreds and Indians and can thus be used as synonym for non whites BEE introduced a scorecard which rates companies based on their economic inclusion of black people If the respective company receives a low rating on the scorecard there will likely be a negative effect on their profit compared to a company with a high rating The basic critique of BEE is that its main beneficiary is a small elite Studies about the actual effects of BEE are rare as data on this topic is limited
