Remember the first time you planted a seed and watched it sprout Or explored how a magnet attracted a nail If these questions bring back memories of joy and wonder then you understand the idea behind inquiry based science an approach to science education that challenges children to ask questions solve problems and develop scientific skills as well as gain knowledge Inquiry based science is based on research and experience both of which confirm that children learn science best when they engage in hands on science activities rather than read from a textbook The recent National Science Education Standards prepared by the National Research Council call for a revolution in science education They stress that the science taught must be based on active inquiry and that science should become a core activity in every grade starting in kindergarten
