identified according to the morphological treatment of the comitative and its syncretistic association with other concepts It is shown that the structural behaviour of comitatives is areally biased and that the languages of Europe tend to diverge from the majority of the world's languages This has important repercussions for a language independent definition of the comitative The supposed conceptual closeness of comitative and instrumental is discussed in some detail and a semantic map of the comitative is put forward Markedness is the crucial concept for the evaluation of the relation that ties comitatives and instrumentals to each other In a separate chapter the diachrony of comitatives is looked into from the perspective of grammaticalisation research Throughout the book the argumentation is richly documented by empirical data The book contains three case studies of the comitative in Icelandic Latvian and Maltese each of which represents one of the three language types identified earlier in the text For the purpose of comparing the languages of Europe a chapter is devoted to the analysis of a large parallel literary corpus covering 64 languages which reveals that the parameters of genetic affiliation areal location and typological classification interact in intricate ways when it comes to predicting whether or not two languages of the sample behave similarly as to the use to which they put their comitative morphemes With a view to determining the degree of similarity between the languages of the European sub sample methods of quantitative typology are employed General linguists with an interest in case functional typologists grammaticalisation researchers and experts of markedness issues will value this book as an important contribution to their respective fields of interest We regret that due to a PDF problem the figure on page 111 is partly shown in black Please find the correct table here [The Routledge Concise Compendium of the World's Languages](#) George L. Discourse Particles Xabier Artiagoitia, Arantzazu Elordieta, Sergio Monforte, 2022-05-17 Discourse particles have often been treated as a phenomenon restricted to Germanic languages Abraham 2020 and they still raise questions about their nature as an independent category This book reveals that this phenomenon exists in other languages as well and provides evidence for their nature as a separate category The volume brings together a collection of nine papers that focus on three research topics a the diachronic development of discourse particles b their syntactic analysis and c the study of their semantic pragmatics Furthermore it also discusses other issues less often dealt with in the literature but of great interest for linguistic theory such as the acquisition of discourse particles by children or the analysis of elements not usually considered discourse particles but whose historical path or microvariation indicates otherwise Additionally the book offers a cross linguistic perspective as it discusses various languages including Basque Catalan German Italian Laz Mandarin Chinese Old English Portuguese and Spanish

**Grammars in Contact** Alexandra Y. Aikhenvald, R. M. W. Dixon, 2007-01-04 Languages can be similar in many ways they can resemble each other in categories constructions and meanings and in the actual forms used to express these A shared feature may be based on common genetic origin or result from geographic proximity and borrowing Some aspects of grammar are spread more readily than others The question is which are they When languages are in contact with each other what changes do we expect to occur in their grammatical structures Only an inductively based cross linguistic examination can provide an answer This is what this volume is about The book starts with a typological introduction outlining principles of contact induced change and factors which facilitate diffusion of linguistic traits It is followed by twelve studies of contact induced changes in languages from Amazonia East and West Africa Australia East Timor and the Sinitic domain Set alongside these are studies of Pennsylvania German spoken by Mennonites in Canada in contact with English Basque in contact with Romance languages in Spain and France and language contact in the Balkans All the studies are based on intensive fieldwork and each cast in terms of the typological parameters set out in the introduction The book includes a glossary to facilitate its use by graduates and advanced undergraduates in linguistics and in disciplines such as anthropology
