## Body Bazaar:

**Harper's Bazaar**, 1896      **Our Bodies, Whose Property?** Anne Phillips, 2013-07-21 An argument against treating our bodies as commodities No one wants to be treated like an object regarded as an item of property or put up for sale Yet many people frame personal autonomy in terms of self ownership representing themselves as property owners with the right to do as they wish with their bodies Others do not use the language of property but are similarly insistent on the rights of free individuals to decide for themselves whether to engage in commercial transactions for sex reproduction or organ sales Drawing on analyses of rape surrogacy and markets in human organs *Our Bodies Whose Property* challenges notions of freedom based on ownership of our bodies and argues against the normalization of markets in bodily services and parts Anne Phillips explores the risks associated with metaphors of property and the reasons why the commodification of the body remains problematic What she asks is wrong with thinking of oneself as the owner of one's body What is wrong with making our bodies available for rent or sale What if anything is the difference between markets in sex reproduction or human body parts and the other markets we commonly applaud Phillips contends that body markets occupy the outer edges of a continuum that is in some way a feature of all labor markets But she also emphasizes that we all have bodies and considers the implications of this otherwise banal fact for equality Bodies remind us of shared vulnerability alerting us to the common experience of living as embodied beings in the same world Examining the complex issue of body exceptionalism *Our Bodies Whose Property* demonstrates that treating the body as property makes human equality harder to comprehend      **Data Made Flesh** Robert Mitchell, Phillip Thurtle, 2013-02-01 In an age of cloning cyborgs and biotechnology the line between bodies and bytes seems to be disappearing *DataMade Flesh* is the first collection to address the increasingly important links between information and embodiment at a moment when we are routinely tempted in the words of Donna Haraway to be raptured out of the bodies that matter in the lust for information whether in the rush to complete the Human Genome Project or in the race to clone a human being      *Self-determination in Health Care* Leroy C. Edozien, 2016-03-03 It is generally accepted in legal and bioethical discourse that the patient has a right to self determination In practice though this is often not the case Paternalism is waning and it is increasingly recognised that there are values other than medical factors which determine the choices that patients make Unfortunately these developments have not resulted in huge advances for patient self determination which is largely because the consent model has fundamental flaws that constrain its effectiveness This book sets out to offer an alternative model to consent In the property model proposed here the patient's bodily integrity is protected from unauthorised invasion and their legitimate expectation to be provided with the relevant information to make an informed decision is taken to be a proprietary right It is argued that the property model potentially overcomes the limitations of the consent model including the obstacle caused by the requirement to prove causation in consent cases The author proposes that this model could in the future provide an alternative or complementary approach for the courts to

consider when dealing with cases relating to self determination in health care

### **Reconceiving Medical Ethics**

Christopher Cowley,2012-02-09 This volume of original work comprises a modest challenge sometimes direct sometimes implicit to the mainstream Anglo American conception of the discipline of medical ethics It does so not by trying to fill the gaps with exotic minority interest topics but by re examining some of the fundamental assumptions of the familiar philosophical arguments and some of the basic situations that generate the issues The most important such situation is the encounter between the doctor and the suffering patient which forms one of the themes of the book The authors show that concepts such as the body suffering and consent and the role such concepts play within patients lives are much more complicated than the Anglo American mainstream appreciates Some of these concepts have been discussed with subtlety by Continental philosophers like Heidegger Ricoeur and a secondary purpose of the volume is to apply their ideas to medical ethics Designed for upper level undergraduates and graduate students with some philosophical background in ethics
