ATP and the Heart Joanne S. Ingwall,2012-12-06 ATP plays a central role in the two leading causes of cardiac morbidity and mortality in the western world ischemia and heart failure We are in our infancy applying what is known about biology and chemistry of ATP toward developing effective therapies for these diseases In this volume the current understanding of the chemistry and biology of ATP specifically in the cardiomyocyte is presented New insights into ATP have been gleaned using biophysical techniques allowing dynamic measurement of chemical events in the intact beating heart and using new animal models in which cardiac proteins are either over expressed deleted or harbor specific mutations This book provides a summary of the basic understanding and includes illustrations of why ATP and the Heart is important to both the clinician and scientist

**Oxygen/Nitrogen Radicals: Cell Injury and Disease** Val Vallyathan,Vince Castranova,Xianglin Shi,2012-12-06 A veritable mountain of literature has been published showing the causal relationship of reactive oxygen nitrogen species in human disease conditions and there has been an explosion in the understanding of oxidative stress the protective role of antioxidants and molecular events involved in the regulation of transcription editing and translation of key events leading to disease processes Strategies need to be developed for prevention of diseases by allowing scientists and clinicians to obtain

information on new and emerging advances The molecular mechanisms involved in several diseases including Alzheimer s disease atherosclerosis diabetes arthritis and Parkinson s disease as well as disorders of the eye skin cardiac and pulmonary systems are discussed in this volume along with scientific evidence supporting the value of dietary supplementation with antioxidants in the prevention of cellular damage leading to chronic disease Special in vivo techniques are also discussed at length along with the role of molecular studies in human risk assessment Understanding Disease: How your heart, lungs, blood and blood vessels function and respond to treatment Glenn Langer, Glenn A. Langer, 1999 Dr Glenn Langer introduces ten more patients whose case histories physical findings and laboratory test results you ll explore with him In clear everyday language he explains the physical process at the core of each illness starting at the level of the vital organs then focusing in on the individual cells and the very molecules at work in their depths Describing the how and why of treatment Dr Langer then reassembles the pieces reforming the full picture of the disease as it appears in the whole patient BOOK JACKET

Signaling in the Heart José Marín-García, 2011-06-21 Signal transduction pathways are at the core of most biological processes and are critical regulators of heart physiology and pathophysiology The heart is both a transmitter and dynamic receptor of a variety of intracellular and extracellular stimuli playing a critical role of an integrator of diverse signaling

mechanisms Alterations in signaling pathways are contributing factors in the development and progression of a broad spectrum of diseases ranging from dysrhythmias and atherosclerosis to hypertension and the metabolic syndrome Targeting specific components of these signaling pathways has been shown to be effective in preclinical studies with significant therapeutic impact This book brings together current knowledge in cardiovascular cell signal transduction mechanisms advances in novel therapeutic approaches to improve cardiac function and discussion of future directions Presented from a post genomic perspective this exciting book introduces important new ideas in cardiovascular systems biology It is an invaluable reference for cardiology researchers and practitioners
