Goodall,2017 This illustrated book covers the complete history of the United States Los Angeles class attack submarines from initial design and construction through testing and trials to its current operations The nuclear powered USS Los Angeles SSN 688 class attack submarine represented the lead ship of the largest group of vessels constructed for the US Navy during the Cold War and was purposefully designed for anti submarine operations against the Soviets Sixty two boats were built and launched between 1976 and 1996 and the class continues to serve in force to this day The exclusive and extensive photographic coverage of the boat s interior is featured here for the first time Details of the boats armament includes four 21 bow mounted torpedo tubes supporting the Mk 48 ADCAP torpedo series Tomahawk BGM 109 cruise missile and Harpoon UGM 84 anti ship missile capability The author s unprecedented access allows the reader a first time view of these submarines [US Nuclear Submarines](#) Jim Christley,2012-01-20 A detailed examination of the controversial design and development of the US nuclear submarine exploring the engineering and safety issues that have dogged their deployment [Report on United States Nuclear-powered Attack Submarine Program](#) United States. General Accounting Office,2001 [Attack Submarines in the Post-Cold War Era](#) Don M. Snider,1993 **Soviet Cold War Attack Submarines** Edward Hampshire,2020-09-17 In this highly detailed book naval historian Edward Hampshire reveals the fascinating history of the nuclear powered attack submarines built and operated by the Soviet Union in the Cold War including each class of these formidable craft as they developed throughout the Cold War period The November class which were the Soviet Union s first nuclear submarines had originally been designed to fire a single enormous nuclear tipped torpedo but were eventually completed as boats firing standard torpedoes The Alfa class were perhaps the most remarkable submarines of the Cold War titanium hulled which was light and strong but extremely expensive and difficult to weld successfully crewed with only thirty men due to considerable automation and 30% faster than any US submarines they used a radical liquid lead bismuth alloy in the reactor plant The Victor class formed the backbone of the Soviet nuclear submarine fleet in the 1970s and 1980s hunter killer submarines began to focus on tracking and potentially destroying NATO ballistic missile submarines The Sierra classes were further titanium hulled submarines and the single Mike class submarine was an experimental type containing a number of innovations Finally the Akula class were being constructed as the Cold War ended and these boats form the mainstay of the Russian nuclear attack submarine fleet today This book explores the design development and deployment of each of these classes in detail offering an unparalleled insight into the submarines which served the Soviet Union throughout the Cold War period The text is supported by stunning illustrations photographs and diagrams of the submarines **Attack Submarines** United States. *U.S. Navy's Future Submarine Force Structure* United States. Congress. House. Committee on Armed Services. Projection Forces Subcommittee,2006      [Silent and Unseen](#) Alfred Scott McLaren,2015-05-15 Silent and Unseen is a memoir of a submariner's life on a U S attack submarine during the Cold War by Capt Alfred S McLaren an experienced submarine officer and nuclear attack submarine commander He describes in riveting detail the significant events that occurred early in the Cold War during his seven years 1958-65 on board three attack submarines the USS Greenfish SS 351 USS Seadragon SSN 584 and USS Skipjack SSN 585 He took part in the first submerged transit of the Northwest Passage a Baffin Bay expedition and as commander of USS Queenfish SSN 651 a North Pole expedition that completed the first survey of the entire Siberian Continental Shelf McLaren's stories and anecdotes offer a look at the development of attack boat tactics and under ice exploration techniques During the early high risk years of the Cold War submarines were continually at sea and each reconnaissance and intelligence collection mission was of potentially great value to the United States The missions often required zeroing in on the potential enemy to collect the intelligence desired generally within weapons range Unlike a war patrol the U S attack boat had to remain undetected and then withdraw as silently and unseen as its original approach Greenfish was one of the most successful Pacific diesel submarines when McLaren served aboard her as a watch and weapons officer He then served as watch officer on the Seadragon when she became the first nuclear submarine to transit from the Atlantic to the Pacific via the Arctic Ocean En route she examined the underside of icebergs conducted the first underwater survey and passage through the Northwest Passage and surfaced at the North Pole McLaren concludes by recounting his experiences on board what was then the world's fastest and most advanced submarine USS Skipjack SSN 585 during the Cuban Missile Crisis two Cold War missions and the very intensive and exciting period of new tactical and weapons development which followed to counter a rapidly emerging Soviet nuclear submarine threat      **Navy Virginia**

**(Ssn-774) Class Attack Submarine Procurement** Congressional Research Service,2015-06-26 The Navy has been procuring Virginia SSN 774 class nuclear powered attack submarines since FY1998 The two Virginia class boats requested for procurement in FY2015 are to be the 21st and 22nd boats in the class The 10 Virginia class boats programmed for procurement in FY2014-FY2018 two per year for five years are being procured under a multiyear procurement MYP contract

Goodall,2020-06-28 Successors to the US Navy's Los Angeles class fast attack submarines presented in volume 1 the Seawolf and Virginia class SSNs are presented here from their initial design and construction through testing and trials to current operations From its debut in 1997 the nuclear powered Seawolf SSN 21 represented the lead ship of the deadliest submarine ever to be constructed for the USN during the Cold War With the end of the Cold War the Seawolf class SSNs were limited to the three that were under construction at the time and the program was terminated

With only three in the class the supersecret USS Jimmy Carter SSN 23 is virtually off limits to any and all photography The author s unprecedented access onboard a Seawolf class SSN the USS Connecticut SSN 22 is a first for the Navy and provides exclusive coverage found only in this book In place of the Seawolf class the Virginia class attack submarine is an advanced stealth multimission nuclear powered submarine for deep ocean antisubmarine warfare and littoral shallow water operations
