Subcommittee on Seapower and Strategic and Critical Materials,1979 **Analysis of Risks Associated with Nuclear Submarine Decommissioning, Dismantling and Disposal** Ashot A. Sarkisov,Alain Tournyol du Clos,1999-02-28 A great number of nuclear submarines are due to be decommissioned before 2000 The political decisions surrounding the disposal of nuclear compartments radioactive wastes and spent fuel differ appreciably between the countries that own the boats The decision makers involved thus need help in comparing and assessing alternative options for the decommissioning of their nuclear submarine fleets The present volume offers such assistance with its discussions of the risks associated with long term water storage of the boats radioactive and chemical contamination spent fuel and waste management and handling and recycling reactor compartments **The Atomic Submarine** John Bryan Lewellen,1954 How the atomic submarine was developed Grades 6 8 Bulletin of the Atomic Scientists ,1968-04 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **The Silent Deep** James Jinks,Peter Hennessy,2015-10-29 The Ministry of Defence does not comment upon submarine operations is the standard response of officialdom to enquiries about the most secretive and mysterious of Britain s armed forces the Royal Navy Submarine Service Written with unprecedented co operation from the Service itself and privileged access to documents and personnel The Silent Deep is the first authoritative history of the Submarine Service from the end of the Second World War to the present It gives the most complete account yet published of the development of Britain s submarine fleet its capabilities its weapons its infrastructure its operations and above all from the testimony of many submariners and the first hand witness of the authors what life is like on board for the denizens of the silent deep Dramatic episodes are revealed for the first time how HMS Warspite gathered intelligence against the Soviet Navy s latest ballistic missile carrying submarine in the late 1960s how HMS Sovereign made what is probably the longest ever trail of a Soviet or Russian submarine in 1978 how HMS Trafalgar followed an exceptionally quiet Soviet Victor III probably commanded by a Captain known as the Prince of Darkness in 1986 It also includes the first full account of submarine activities during the Falklands War But it was not all victories confrontations with Soviet submarines led to collisions and the extent of losses to UK and NATO submarine

technology from Cold War spy scandals are also made more plain here than ever before In 1990 the Cold War ended but not for the Submarine Service Since June 1969 it has been the last line of national defence with the awesome responsibility of carrying Britain s nuclear deterrent The story from Polaris to Trident and now Successor is a central theme of the book In the year that it is published Russian submarines have once again been detected off the UK s shores As Britain comes to decide whether to renew its submarine carried nuclear deterrent The Silent Deep provides an essential historical perspective

Central Intelligence Agency,1965 **Nuclear Submariners** Antony Loveless,2009-08 Describes life aboard a nuclear submarine w m *China's Future Nuclear Submarine Force* Andrew S. Erickson,2007 One of the key concerns of naval strategists and planners today is the nature of the Chinese geostrategic challenge Conceding that no one can know for certain China s intentions in terms of future conflict the editors of this hot topic book argue that the trajectory of Chinese nuclear propulsion for submarines may be one of the best single indicators of China s ambitions of global military power Nuclear submarines with their unparalleled survivability remain ideal platforms for persistent operations in far flung sea areas and offer an efficient means for China to project power This collection of essays presents the latest thinking of leading experts on the emergence of a modern nuclear submarine fleet in China Each contribution is packed with authoritative data and cogent analysis The book has been compiled by four professors and analysts at the U S Naval War College who are co founders of the college s recently established China Maritime Studies Institute Given the opaque nature of China s undersea warfare development readers will benefit from this penetrating investigation that considers the potential impact of even the most revolutionary changes in Chinese nuclear submarine capabilities The editors believe that to ignore such possibilities would be the height of strategic folly and represent inexcusable negligence in terms of U S national defense Anyone who is interested in the future of the U S Navy and the defense of the United States will find this book to be essential reading *How Atomic Submarines are Made* David Coxe Cooke,1967 Follows the building of a nuclear submarine from first plans and models through all phases of construction to commissioning and sea trials *Submarines, Diving, and the Underwater World* Frank J. Anderson,1975 **Soviet Cold War Attack Submarines** Edward Hampshire,2020-09-17 In this highly detailed book naval historian Edward Hampshire reveals the fascinating history of the nuclear powered attack submarines built and operated by the Soviet Union in the Cold War including each class of these formidable craft as they developed throughout the Cold War period The November class which were the Soviet Union s first nuclear submarines had originally been designed to fire a single enormous nuclear tipped torpedo but were eventually completed as boats firing standard torpedoes The Alfa class were perhaps the most remarkable submarines of the Cold War titanium hulled which was light and strong but extremely expensive and difficult to weld successfully crewed with only thirty men due to considerable automation and 30% faster than any US submarines they used a radical liquid lead bismuth alloy in the reactor plant The Victor class formed the backbone of the Soviet nuclear submarine

fleet in the 1970s and 1980s as hunter killer submarines began to focus on tracking and potentially destroying NATO ballistic missile submarines The Sierra classes were further titanium hulled submarines and the single Mike class submarine was an experimental type containing a number of innovations Finally the Akula class were being constructed as the Cold War ended and these boats form the mainstay of the Russian nuclear attack submarine fleet today This book explores the design development and deployment of each of these classes in detail offering an unparalleled insight into the submarines which served the Soviet Union throughout the Cold War period The text is supported by stunning illustrations photographs and diagrams of the submarines
