

# Recognizing Early Motor Delays

## A Comparison Examination of 4 Month Old Infants

Supine

- Exhibits midline and symmetry of head, eyes, arms and legs
- Shows visual engagement and reaches out against gravity
- Demonstrates frequent antigravity extremity movement, dissociating from a more stable trunk

Typical

- Displays asymmetry of head and extremities, with head tilted and body curved
- Does not show a balance between extension and flexion
- Moves extremities randomly, but without expected antigravity movement
- Is not visually engaged and does not track object

Atypical

Sidelying

- Uses upper arm and dissociated lower extremities to assist in facilitated roll
- Sustains sidelying posture with a balance of trunk flexor and extensor muscles
- Lifts head and upper trunk off the surface in preparation for independent rolling

- Exhibits sluggishness in top arm during facilitated roll
- Does not sustain sidelying posture; has inadequate control in position
- Cannot lift head and upper trunk off support surface

Prone

- Brings shoulders and upper arms forward with elbows in front of shoulders
- Shows progression toward lower extremity extension and adduction
- Moves arms forward to reach for an object; turns head freely to follow object
- Displays extensor activity into the lumbar spine

- Has flexed hips which shifts weight forward while keeping elbows behind shoulders
- Uses only neck extension instead of forearm weight bearing; head lifting is unassisted
- Does not have the capability to shift weight onto lower extremities

Pull to Sit

- Maintains head in midline without head-lag and with good chin tuck
- Lifts legs and activates trunk muscles to assist in maneuver
- Pulls forward with both arms and abdominals to assist further in pull to sit

- Demonstrates head-lag and cannot sustain head lifting once upright
- Does not pull with arms; no upper extremity participation
- Appears not to anticipate movement toward sitting

## **Atypical Infant Development:**

**Atypical Infant Development** Marci J. Hanson, 1984 *Atypical Child Development in Context* Janet Empson, 2015-09-11 The book considers the important issue of what is normal and what is atypical in child development. It examines the main processes involved in developing atypically as well as the circumstances and conditions associated with it. The second edition is fully updated and features new research case studies, real life examples and figures. Typical and Atypical Development in Early Childhood Ayshe Talay-Ongan, 2000-01 *Typical and Atypical Development in Early Childhood* Ayshe Talay-Ongan, 1998 This is a reference text on child development up to the age of eight years. Covering the main features of physiology, cognitive, emotional and language development in normal children using an age stage approach, it then looks at the major developmental problems as well as looking at the development of gifted children. *Woman and Mental Health* Phyllis E. Cromwell, 1974 Emotional Development in Atypical Children Michael Lewis, Margaret Wolan Sullivan, 2014-03-05 Early emotional development, emotional regulation and the links between emotion and social or cognitive functioning in atypically developing children have not received much attention. This lack is due in part to the priorities given to the educational and therapeutic needs of these children. Yet an understanding of the basic emotional processes in children with atypical development can only serve to promote more effective strategies for teaching and intervening in the lives of these children and their families and may contribute to our understanding of basic emotional processes as well. When referring to emotions, the editors mean some complex set of processes or abilities, whether or not the topic is normal or atypical development. Specifically, they use the term emotion to refer to at least three things: emotional expressions, emotional states and emotional experiences. The focus of this volume, these three aspects of emotional life, are affected by socialization practices, maturational change and individual biological differences, including in this case differences in children as a function of disability. Contributors examine the development of emotions in children with organic or psychological disorders as well as those in compromised social contexts, making this volume of prime importance to developmental, clinical and social psychologists, educators and child mental health experts. **Essential Psychology** Philip Banyard, Mark N. O. Davies, Christine Norman, Belinda Winder, 2010-03-12 Electronic Inspection Copy available for instructors here. The distinctive contribution of this text is to provide a far-reaching and up-to-date analysis of key issues in psychology in a highly accessible format. This reflects the authors' considerable skills as scholars who are highly attuned to the needs of both students and teachers. Their text succeeds admirably in bringing psychology to life and life to psychology. S. Alexander Haslam, Professor of Psychology, University of Exeter. For students studying psychology for the first time, *Essential Psychology: A Concise Introduction* represents a fresh alternative to the range of expensive US-oriented titles on the market that are full of topics you need but also many you don't need on your course. This UK team-authored textbook is written by psychologists who specialize in each of the subject areas covered in their research and teaching. Spanning 18 chapters but concentrating on the

six fundamental topic areas taught at introductory level Conceptual and Historical Issues in Psychology Cognitive Psychology Biological Psychology Social Psychology Developmental Psychology and The Psychology of Individual Differences This textbook has everything students need to know inside is stylish and colourful and has an abundance of learning features to make the start of the student journey an enjoyable and successful one too A range of reflective devices encourage critical thinking about these topics to provide a handy companion as students progress Visit the companion website at [www.sagepub.co.uk/banyard](http://www.sagepub.co.uk/banyard)

**Infant Development** Charles W. Snow,1998 Appropriate for undergraduate courses in Infant Development Infant Care and Infancy Intervention Also suitable as a supplementary text for general courses in Child Development or Child Psychology This text covers infant development from conception through the first years of life from an interdisciplinary perspective Following the same topical format of the first edition today's Second Edition features comprehensive current information on each area of importance in infant development The text's balanced coverage of theory research and practical application as well as the strong emphasis on the interrelationships between various developmental domains and the importance of the whole infant have been retained and enhanced

**Help Him Make You Smile** Rita S. Eagle,2007-03-14 Intersubjectivity refers to the motivation and capacity to connect and share one's own inner world with that of another person This book addresses the questions how does this precious human communication develop in infancy and what can or should be done when it does not develop The author presents a unique chronicle describing the day by day emergence of intersubjectivity in her infant son born with neurodevelopmental disabilities These observations are analyzed in the context of a critical review of theory and research about intersubjectivity in normal children and in children with atypical development From both sources emerges a model for how intersubjectivity develops in the parent infant interaction and guidelines for how to intervene when it does not While acknowledging the inroads that have been made in understanding this unique human capacity the author points to the questions that remain to be addressed in future research The book ends with a rare opportunity to follow the trajectory of her son's capacity for intersubjectivity over a period of more than thirty years It is addressed to theorists and researchers clinicians who work with infants and children with developmental disorders and their families and parents who want to understand their children's development
