Decade Of Concurrency:

A Decade of Concurrency J. W. de Bakker, W. P. de Roever, G. Rozenberg, 2014-01-15 *A Decade of Concurrency*, 1994 [A Decade of Concurrency](#) J.W.de Bakker, W.-P.de Roever, G. Rozenberg, 1994-06-28 The REX School Symposium A Decade of Concurrency Reflections and Perspectives was the final event of a ten year period of cooperation between three Dutch research groups working on the foundations of concurrency Ever since its inception in 1983 the goal of the project has been to contribute to the cross fertilization between formal methods from the fields of syntax semantics and proof theory aimed at an improved understanding of the nature of parallel computing The material presented in this volume was prepared by the lecturers and their coauthors after the meeting took place In total the volume constitutes a thorough state of the art report of the research activities in concurrency *A Decade of Concurrency*, 1994 **A 25-Year Perspective on Logic Programming** Agostino Dovier, Enrico Pontelli, 2010-06-26 This book celebrates the 25th anniversary of GULP the Italian Association for Logic Programming Authored by Italian researchers at the leading edge of their fields it presents an up to date survey of a broad collection of topics in logic programming making it a useful reference for both researchers and students During its 25 year existence GULP has organised a wide range of national and international activities including both conferences and summer schools It has been especially active in supporting and encouraging young researchers by providing scholarships for GULP events and awarding distinguished dissertations We in the international logic programming community look upon GULP with a combination of envy admiration and gratitude We are pleased to attend its conferences and summer schools where we can learn about scientific advances catch up with old friends and meet young students It is an honour for me to acknowledge our appreciation to GULP for its outstanding contributions to our field and to express our best wishes for its continuing prosperity in the future March 2010 Robert Kowalski Imperial College London Preface On June 18 1985 a group of pioneering researchers including representatives from industry national research labs and academia attended the constituent assembly of the Group of researchers and Users of Logic Programming GULP association That was the starting point of a long adventure in science that 1 we are still experiencing 25 years later This volume celebrates this important event *Theory and Practice in Distributed Systems* Kenneth P. Birman, Friedemann Mattern, Andre Schiper, 1995-07-14 This book summarizes the current knowledge on a cascade of gene regulation levels which operate in the cytoplasm of eukaryotic cells and which has until recently been poorly understood While transcriptional control of eukaryotic genes has been extensively researched and the understanding of this process has reached very sophisticated levels post transcriptional control has received much less attention As the contributions in this book demonstrate not only is post transcriptional control in eukaryotes better understood it is now thought to be a major player in gene expression control in a number of key processes i.e control of cell proliferation gametogenesis and early development or cellular homeostasis [Advances in Concurrent Engineering](#) R.
