Meaning and Value in a Secular Age Paul Kurtz,2012-06-26 The secular age has confronted human beings with a fundamental challenge While the naturalistic worldview rooted in science has persuasively shown that traditional religious conceptions of the universe are unsustainable it has so far offered no compelling secular narratives to replace the religious narratives so entrenched in civilization In the absence of religion how do thoughtful contemporary individuals find meaning in a secular world In this book philosopher Paul Kurtz argues for a new approach that he calls eupraxsophy Kurtz first coined the term in 1988 to characterize a secular orientation to life that stands in contrast to religion Derived from three ancient Greek roots eupraxsophy literally means good practice and wisdom Drawing upon philosophy science and ethics eupraxsophy provides a thoroughly secular moral vision which respects the place of human values in the context of the natural world and presents an empirically responsible yet hopeful picture of the human situation and the cosmos in which we abide Editor Nathan Bupp has conveniently gathered together Kurtz s key writings about the theory and practice of eupraxsophy for the first time in this volume Written with eloquence and scope these incisive essays show how Kurtz s brand of humanism moves above and beyond the current new atheism Eupraxsophy successfully bridges the cultural divide between science and value and provides a genuine and constructive alternative to religion Bupp s informative introduction places the concept of eupraxsophy in historical perspective and shows why it is critically important and relevant today The Moon of the Fourteenth Night Eustache de Lorey,Douglas Brooke Wheelton Sladen,1910 **Hearings, Reports and Prints of the Senate Committee on the Judiciary** United States. Hodgson** Ovid,1876 The Development of Ethics: Volume 2 Terence Irwin,2008-07-31 The Development of Ethics is a selective historical and critical study of moral philosophy in the Socratic tradition with special attention to Aristotelian naturalism It discusses the main topics of moral philosophy as they have developed historically including the human good human nature justice friendship and morality the methods of moral inquiry the virtues and their connexions will freedom and responsibility reason and emotion relativism subjectivism and realism the theological aspect of morality This volume examines early modern moral philosophy from the sixteenth to the eighteenth century Volume 3 will continue the story up to Rawls s Theory of Justice The present volume begins with Suarez s interpretation of Scholastic moral philosophy and examines seventeenth and eighteenth century responses to the Scholastic outlook to see how far they constitute a distinctively different conception of moral philosophy The treatments of natural law by Grotius Hobbes Cumberland and Pufendorf are treated in some detail Disputes about moral facts moral judgments and

moral motivation are traced through Cudworth Clarke Balguy Hutcheson Hume Price and Reid Butler's defence of a naturalist account of morality is examined and compared with the Aristotelian and Scholastic views discussed in Volume 1. The volume ends with a survey of the persistence of voluntarism in English moral philosophy and a brief discussion of the contrasts and connexions between Rousseau and earlier views on natural law. The emphasis of the book is not purely descriptive narrative or exegetical but also philosophical. Irwin discusses the comparative merits of different views, the difficulties that they raise and how some of the difficulties might be resolved. The book tries to present the leading moral philosophers of the past as participants in a rational discussion that is still being carried on and tries to help the reader to participate in this discussion.
