Decision Making Game:

Human-Like Decision Making and Control for Autonomous Driving Peng Hang, Chen Lv, Xinbo Chen, 2022-07-25 This book details cutting edge research into human like driving technology utilising game theory to better suit a human and machine hybrid driving environment Covering feature identification and modelling of human driving behaviours the book explains how to design an algorithm for decision making and control of autonomous vehicles in complex scenarios Beginning with a review of current research in the field the book uses this as a springboard from which to present a new theory of human like driving framework for autonomous vehicles Chapters cover system models of decision making and control driving safety riding comfort and travel efficiency Throughout the book game theory is applied to human like decision making enabling the autonomous vehicle and the human driver interaction to be modelled using noncooperative game theory approach It also uses game theory to model collaborative decision making between connected autonomous vehicles This framework enables human like decision making and control of autonomous vehicles which leads to safer and more efficient driving in complicated traffic scenarios The book will be of interest to students and professionals alike in the field of automotive engineering computer engineering and control engineering

Decision-Making Games: Effects on Future Decisions of Adolescents Dalian K. Rivera, 2018 I propose research that examines whether decision making video games have positive effects on the everyday decision of adolescents The research will be conducted on 30 adolescents young adults ages 18 24 who have very little gaming experience Subjects will complete a survey examining their decision making capabilities problem solving ability and their mental speed They will be randomly placed into two groups of 15 the experimental and the control The experimental group will participate in an online decision making game Imprisoned and Alter Ego for a total of five hours over a three week period The control group will not play any online games I will then retest all the subjects I hypothesize that moderate play of decision making games by adolescents and young adults can improve the decision making abilities in their everyday lives as well as enhance their problem solving skills and increase the speed of their thought processing capabilities

Real-World Applications of Game Theory and Optimization Dun Han, Jianbo Wang, Jianrong Wang, Matjaž Perc, 2024-08-16 This research topic centers on the practical application of game theory and optimization methods to address complex challenges in real world contexts At its core game theory provides a framework for analyzing strategic interactions among rational decision makers while optimization techniques are designed to seek the most favorable outcomes These tools have proven to be powerful assets across a wide range of domains from economics and computer science to social sciences and engineering The following objectives guide this exploration i Understanding Game Theory and Optimization in Real world Contexts This objective involves investigating

how these mathematical constructs are applied to model and resolve problems across various fields

- ii Analyzing the Effectiveness of Game Theory and Optimization Techniques This involves studying real world case studies and practical applications with the goal of evaluating the performance and efficiency of these methods in practice
- iii Identifying Potential Areas for Effective Application of Game Theory and Optimization This objective aims to pinpoint sectors or disciplines that may significantly benefit from the application of these mathematical techniques

The goal of this Research Topic in Frontiers in Physics aims to produce a comprehensive understanding of the real world applications of game theory and optimization highlighting their practical impact and potential for future use It will provide valuable insights for professionals and researchers working in the fields where these techniques can be applied and contribute to the body of knowledge in game theory and optimization Potential topics include but are not limited to the following

- 1 Economics and Business How are game theory and optimization used to make strategic business decisions and to understand economic phenomena
- 2 Computer Science How do these techniques contribute to areas like network design machine learning and algorithm development
- 3 Social Sciences How can game theory and optimization help in understanding social dynamics designing policies and resolving conflicts
- 4 Engineering and Operations Research How are these techniques utilized in system design process optimization and decision making
