Decision-making in American Government, 1977 A textbook focusing on how government decisions are made who makes them what forces and factors influence them and what some of the causes and effects of such decisions can be

Decision Making in American Government John C. Fraenkel, 1980-06-01 [Making Policy, Making Law](#) Mark Carlton Miller, Jeb Barnes, 2004 This volume proposes a new way of understanding the policymaking process in the United States by examining the complex interactions among the three branches of government executive legislative and judicial Collectively across the chapters a central theme emerges that the U S Constitution has created a policymaking process characterized by ongoing interaction among competing institutions with overlapping responsibilities and different constituencies one in which no branch plays a single static part At different times and under various conditions all governing institutions have a distinct role in making policy as well as in enforcing and legitimizing it This concept overthrows the classic theories of the separation of powers and of policymaking and implementation specifically the principal agent theory in which Congress and the presidency are the principals who create laws and the bureaucracy and the courts are the agents who implement the laws if they are constitutional The book opens by introducing the concept of adversarial legalism which proposes that the American mindset of frequent legal challenges to legislation by political opponents and special interests creates a policymaking process different from and more complicated than other parliamentary democracies The chapters then examine in depth the dynamics among the branches primarily at the national level but also considering state and local policymaking Originally conceived of as a textbook because no book exists that looks at the interplay of all three branches it should also have significant impact on scholarship about national lawmaking national politics and constitutional law Intro conclusion and Dodd s review all give good summaries *Budgetary Politics in American Governments* James J. Gosling, 2006 Budgetary Politics in American Governments unlike most public budgeting texts takes a comparative approach to the subject of public budgeting examining budgetary politics at the federal state and local government levels Students are introduced to the budgetary decision making process taxation spending budget execution and financial management as well as the budget process at each level of government Thoroughly updated but preserving much of the third edition s structure and approach this fourth edition contains a new chapter that will introduce students to the interrelationship of economics and politics in budgeting **The Politics of American Economic Policy Making** Paul Peretz, 2016-09-16 A reader on American government and the economy It contains wide ranging articles by people such as Richard Musgrave Milton Friedman James Buchanan and Alan Greenspan **Changing the Heart of Social Policy-Making** Catherine E. Johnson, 2025-07-24 Effective social policy making has been debated for decades by policy makers scholars and the general public As elected officials have lost sight of their purpose in a climate of extreme polarization and partisan politics disappointment and distrust of our government institutions have swelled This book highlights the importance of a change in

the hearts and minds of legislators and provides a new perspective on addressing the public's desire for more effective and humane social policies. Covering the legislative and social policy making process from a historical and contemporary perspective, this book identifies powerful interest groups and corporate dollars which influence our legislative process and erode sound policy ideas and solutions. The book also explores a new generation of youth voters which can influence election and policy outcomes, the current mental health crisis, and the importance of evidence-based research in designing social policies. Several topics are illuminated by real-life experiences, case studies, and practical guidelines.

All Politics is Local - Congressional Decision-making in Foreign Policy Karl Lemberg, 2007-10 Seminar paper from the year 2003 in the subject Politics International Politics Region USA grade 1.0 University of Potsdam course Public policy and institutions 13 entries in the bibliography language English abstract The dominant player in international politics is unmistakably the United States of America. U.S. economic, military, and cultural superiority is shaping world politics and setting the stage for the next generation. U.S. foreign policy features the image of the United States President and to a lesser extent that of the Secretary of State and Defense. They are the predominant figures that drive U.S. foreign policy on the international stage. The system of checks and balances neatly involves two branches of government: executive and legislative in a construct of interdependence. Congress is the government branch of the people. The two-year term cycles for House Representatives and the large number of districts make Congress the most representative institution in the U.S. government. In contemporary political science, the state of being represented is described by Principle-Agent Relationship, in which the representative, the agent, closely represents his constituency, the principle. It doesn't pay off for my constituency, said Rep. Grace Napolitano (D-CA) when asked why she wanted to get off of the House International Relations Committee (HIRC). This incident was my first impression of foreign policy in the U.S. Congress. Having heard that I went to a HIRC oversight hearing to see how they conduct their business, what struck me most was the fact that the members devoted approx. half of their speaking time of total five minutes to the actual issue at stake and the other half to an issue that was absolutely irrelevant to the pending business. As I found out later, the irrelevant issues were important for the individual member to have been mentioned to the panel and C-SPAN. The subsequent past months I spent on the Hill observed
