## **Decision Making In Organisations:**

**Top Decisions** David John Hickson, University of Bradford. Management Centre, 1986 Based on studies carried out at the Bradford Management Centre in Britain 1970 1984 *The Psychology of Decision Making* Lee R. Beach, Terry Connolly, 2005-01-05 The Psychology of Decision Making provides an overview of decision making as it relates to management organizational behavior issues and research This engaging book examines the way individuals make decisions as well as how they form judgments privately and in the context of the organization It also discusses the interplay of group and institutional dynamics and their effects upon the decisions made within and on the behalf of organizations **Decisions** Karin Brunsson, Nils Brunsson, 2017-12-29 Decisions and the complexity of decision making are central topics in several social science disciplines including those of social psychology political science and the study of organizations This book draws on insights from all of these disciplines and provides a concise overview of some of the most intriguing and salient observations and arguments in the research about decision making The book first deals with basic decision making logics and applies them to both individual and organizational decision making The book then deals with consequences of decisions and the complications of making decisions in a political context where many individuals and organizations are involved

Decision making in organisations Jim Clifford, 1980 Top Decisions David John Hickson, 1986 **Processes of Successful Managerial Decision-making in Organizations** S. B. Rodrigues, University of Bradford, 1980 Decision Making in Organisations Jim Clifford, 1976 **The Consequences of Decision-Making** Nils Brunsson, 2007-01-18 Nils Brunsson is one of the leading European organization theorists who has written and researched decision making in organizations He has often questioned the rationality of decision making and argued that it is as important to understand other consequences of decision making apart from choice such things as mobilizing action allocating responsibility and legitimizing organizations These consequences of decisions can influence decision making and the assumptions about feasible norms that provide their context Decisions often run counter to actions and are part of what Brunsson calls organizational hypocrisy Decisions can substitute for action or decrease the probability of the action they call for The norm of rationality is far from obvious sometimes decision makers can recommend systematic irrationality This book collects together a wide range of Nils Brunsson s most important writing on decision making brought together in one volume for the first time with an introduction from the author *Rational Decisions in Organisations* Frédéric Adam, Dorota Kuchta, Stanisław Stanek, 2022-05-30 Managers in organisations must make rational decisions Rational decision making is the opposite of intuitive decision making It is a strict procedure utilising objective knowledge and logic It involves identifying the problem to solve gathering facts identifying options and outcomes analysing them considering all the relationships and selecting the decision Rational decision making requires support methods and software tools The identification of the problem to solve needs methods that would measure and evaluate the current situation Identification and evaluation of options and analysis of

the available possibilities involves analysis and optimisation methods Incorporating intuition into rational decision making needs adequate methods that would translate ideas or observed behaviours into hard data Communication observation and opinions recording is hardly possible today without adequate software Information and data that form the input intermediate variables and the output must be stored managed and made accessible in a user friendly manner Rational Decisions in Organisations Theoretical and Practical Aspects presents selected recent developments in the support of the widely understood rational decision making in organisations illustrated through case studies The book shows not only the variety of perspectives involved in decision making but also the variety of domains where rational decision support systems are needed The case studies present decision making by medical doctors students and managers of various universities IT project teams construction companies banks and small and large manufacturing companies Covering the richness of relationships in which the decisions should and must be taken the book illustrates how modern organisations operate in chains and networks they have multiple responsibilities including social legal business and ethical duties Nowadays managers in organisations can make transparent decisions and consider a multitude of stakeholders and their diverse features incorporating diverse criteria using multiple types and drivers of information and decision making patterns and referring to numerous lessons learned As the book makes clear the marriage of theoretical ideas with the possibilities offered by technology can make the decisions in organisations more rational and at the same time more human

#### **Decision-Making in an Organizational Context J.**

Rosanas,2013-05-12 Illustrates how decision making in organizations has to go beyond economic criteria and the individual level due to the impossibility of making decisions that do not affect other human beings The author reviews the conventional analyses of decision making that do not take into account how decisions affect others and suggests an alternate model

**Organizational Decision Making** Zur Shapira,2002-03-25 Decision making in organizations is often pictured as a coherent and rational process in which alternative interests and perspectives are considered in an orderly manner until the optimal alternative is selected Yet as many members of organizations have discovered from their own experience real decision processes in organizations only seldom fit such a description This book brings together researchers who focus on cognitive aspects of decision processes on the one hand and those who study organizational aspects such as conflict incentives power and ambiguity on the other It draws from the tradition of Herbert Simon who studied organizational decision making s pervasive use of bounded rationality and heuristics of reasoning These multiple perspectives may further our understanding of organizational decision making Organizational Decision Making is particularly well suited for students and faculties of business psychology and public administration

#### **Decision Making in the Workplace** Lee Roy

Beach,2014-03-05 Many if not most of one s important decisions are made in the context of one s work However because workplace decisions cover such a broad range of issues it often is difficult to detect underlying commonalities in how they are made and in how things go wrong when they do go wrong As a result there are nearly as many different descriptions of

workplace decisions as there are decisions themselves In this volume the best features of these diverse descriptions are unified in a new intuitively compelling view of decision making called Image Theory The result is a clear picture of real life day to day workplace decision making that allows us to think constructively about how such decisions are made and about how to improve them when improvement is necessary *Primer on Decision Making* James G. March, 1994-05-23 Building on lecture notes from his acclaimed course at Stanford University James March provides a brilliant introduction to decision making a central human activity fundamental to individual group organizational and societal life March draws on research from all the disciplines of social and behavioral science to show decision making in its broadest context By emphasizing how decisions are actually made as opposed to how they should be made he enables those involved in the process to understand it both as observers and as participants March sheds new light on the decision making process by delineating four deep issues that persistently divide students of decision making Are decisions based on rational choices involving preferences and expected consequences or on rules that are appropriate to the identity of the decision maker and the situation Is decision making a consistent clear process or one characterized by ambiguity and inconsistency Is decision making significant primarily for its outcomes or for the individual and social meanings it creates and sustains And finally are the outcomes of decision processes attributable solely to the actions of individuals or to the combined influence of interacting individuals organizations and societies March's observations on how intelligence is or is not achieved through decision making and possibilities for enhancing decision intelligence are also provided March explains key concepts of vital importance to students of decision making and decision makers such as limited rationality history dependent rules and ambiguity and weaves these ideas into a full depiction of decision making He includes a discussion of the modern aspects of several classic issues underlying these concepts such as the relation between reason and ignorance intentionality and fate and meaning and interpretation This valuable textbook by one of the seminal figures in the history of organizational decision making will be required reading for a new generation of scholars managers and other decision makers **Decision Making** Johannes M. Pennings, 1986 **Decide and Deliver** Marcia Blenko, Michael C. Mankins, Paul Rogers, 2010-09-27 Dithering Decisions that turn out wrong Decisions that people sabotage or don't know how to implement If your company's experiencing these problems it's not alone Most organizations don't know how to make and execute good decisions And they're paying a high price as profitability and competitiveness erode It doesn't have to be this way In *Decide and Deliver* the authors draw on Bain Company's extensive research to present a five step process for improving your firm's decision effectiveness 1 Assess your decision effectiveness and how your organization affects it 2 Identify your critical decisions 3 Set individual critical decisions up for success 4 Ensure that your company enables and reinforces great decision making and execution 5 Embed the changes in everyday practice Master this process and you see immediate results people across your organization collaborate to make crucial decisions better and faster than your rivals And they execute them flawlessly fueling unprecedented financial

performance Filled with powerful hands on tools and detailed examples from companies as varied as Ford Motor Company British American Tobacco Telstra Lafarge and ABB UK Decide and Deliver helps you make decision management a potent competitive weapon in your company *The Psychology of Decision Making* Lee R. Beach, Terry Connolly, 2005-01-05 The Psychology of Decision Making provides an overview of decision making as it relates to management organizational behavior issues and research This engaging book examines the way individuals make decisions as well as how they form judgments privately and in the context of the organization It also discusses the interplay of group and institutional dynamics and their effects upon the decisions made within and on the behalf of organizations **Decision Management** J. Frank Yates, 2003-01-14 Why do the people in some companies continually dazzle us with their brilliant decisions while those in others make one blunder after another Do they understand their businesses better Are they just plain smarter Or is it all a matter of luck The answer says J Frank Yates is none of the above The real key rarely recognized is how the leaders manage the company s decision processes the leaders decision management practices Drawing on his thirty years of research and experience as well as scholarship from psychology economics statistics strategy medicine and other fields to explain the fundamental nature of business decision problems Yates highlights the ten cardinal decision issues crucial to managing the decision making process and ultimately better company decisions He covers problems ranging from recognizing whether a decision is actually called for to assuring that a preferred course of action will be implemented He shows how solid decisions result when managers ensure that deciders resolve every cardinal issue effectively for every decision problem facing the company He also reveals how conversely chronically poor decisions are traceable to managers allowing or even creating conditions that encourage deciders to fall short in how they address at least one of those critical issues Proceedings of The 5th MAC 2015 group of authors, 2015-10-14 The 5th Multidisciplinary Academic Conference in Prague 2015 Czech Republic The 5th MAC 2015 **Primer on Decision Making** James G. March, 2009-01-23 Building on lecture notes from his acclaimed course at Stanford University James March provides a brilliant introduction to decision making a central human activity fundamental to individual group organizational and societal life March draws on research from all the disciplines of social and behavioral science to show decision making in its broadest context By emphasizing how decisions are actually made as opposed to how they should be made he enables those involved in the process to understand it both as observers and as participants March sheds new light on the decision making process by delineating four deep issues that persistently divide students of decision making Are decisions based on rational choices involving preferences and expected consequences or on rules that are appropriate to the identity of the decision maker and the situation Is decision making a consistent clear process or one characterized by ambiguity and inconsistency Is decision making significant primarily for its outcomes or for the individual and social meanings it creates and sustains And finally are the outcomes of decision processes attributable solely to the actions of individuals or to the combined influence of interacting individuals organizations and

societies March's observations on how intelligence is or is not achieved through decision making and possibilities for enhancing decision intelligence are also provided March explains key concepts of vital importance to students of decision making and decision makers such as limited rationality history dependent rules and ambiguity and weaves these ideas into a full depiction of decision making He includes a discussion of the modern aspects of several classic issues underlying these concepts such as the relation between reason and ignorance intentionality and fate and meaning and interpretation This valuable textbook by one of the seminal figures in the history of organizational decision making will be required reading for a new generation of scholars managers and other decision makers

**Decision Loom** Vincent Barabba, 2011-11-30 Decision making has been one of the principal victims of modern thinking The analytical approach has of course brought us vaccines electricity and the internal combustion engine But in seeking to break things down into their component parts and improve the parts governments and businesses continue to make some astonishingly bad decisions What's more many enterprises still pay close attention to decisions and decision making whilst overlooking the bigger picture the organizational system within which those decisions get made This elegant book is a guide for any public private government or non profit organization that needs a system for making better decisions It sets out to change our analytical habit and invites enterprises to consider the bigger picture Author Vince Barabba presents an elegantly simple approach to making better decisions He calls this approach The Decision Loom and bases it on Systems Thinking Design Thinking and Complexity Theory He also describes the four core capabilities that any organization must put in place for this approach to work What's more because we're humans and prefer stories to instruction manuals the tapestry of the book is embroidered with fascinating examples from the author's lifetime of experience at the head of American corporate and public decision making
