

The Decline of the Nation-State and the End of the Rights of Man

IT IS ALMOST impossible even now to describe what actually happened in Europe on August 4, 1914. The days before and the days after the first World War are separated not like the end of an old and the beginning of a new period, but like the day before and the day after an explosion. Yet this figure of speech is as inaccurate as are all others, because the quiet of sorrow which settles down after a catastrophe has never come to pass. The first explosion seems to have touched off a chain reaction in which we have been caught ever since and which nobody seems to be able to stop. The first World War exploded the European comity of nations beyond repair, something which no other war had ever done. Inflation destroyed the whole class of small property owners beyond hope for recovery or new formation, something which no monetary crisis had ever done so radically before. Unemployment, when it came, reached fabulous proportions, was no longer restricted to the working class but seized with insignificant exceptions whole nations. Civil wars which ushered in and spread over the twenty years of uneasy peace were not only bloodier and more cruel than all their predecessors; they were followed by migrations of groups who, unlike their happier predecessors in the religious wars, were welcomed nowhere and could be assimilated nowhere. Once they had left their homeland they remained homeless, once they had left their state they became stateless; once they had been deprived of their human rights they were rightless, the scum of the earth. Nothing which was being done, no matter how stupid, no matter how many people knew and foretold the consequences, could be undone or prevented. Every event had the finality of a last judgment, a judgment that was passed neither by God nor by the devil, but looked rather like the expression of some unredeemably stupid fatality.

Before totalitarian politics consciously attacked and partially destroyed the very structure of European civilization, the explosion of 1914 and its severe consequences of instability had sufficiently shattered the façade of Europe's political system to lay bare its hidden frame. Such visible exposures were the sufferings of more and more groups of people to whom suddenly the rules of the world around them had ceased to apply. It was precisely the seeming stability of the surrounding world that made each group forced out of its protective boundaries look like an unfortunate exception to
