Deep inelastic scattering

Medium energy: elastic scattering

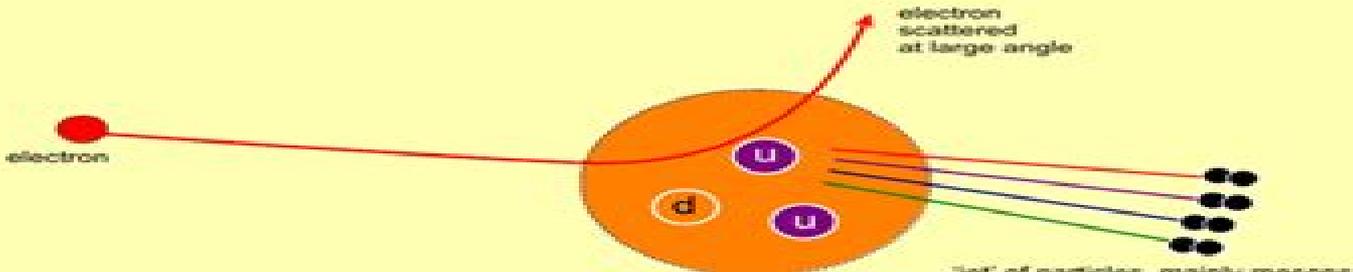

The diagram shows a red circle labeled 'electron' on the left. A red line representing its path curves slightly downwards and to the right, ending in an arrowhead. To the right of the electron's path is a grey circle labeled 'proton' containing three smaller grey circles representing quarks. A line points from the text below to the proton.

Quarks move rapidly inside proton. The interaction time is long enough for the proton to behave like a blur of charge.

Deep inelastic scattering

High energy: deep inelastic scattering

The diagram shows a red circle labeled 'electron' on the left. A red line representing its path enters a large orange circle representing a proton. Inside the proton, there are three smaller circles labeled 'u', 'd', and 'u'. The red line hits the top 'u' quark and then curves sharply upwards and to the right, ending in an arrowhead. From the point of impact, several lines (red, purple, blue, green) extend to the right, ending in a cluster of black dots representing a jet of particles.

electron scattered at large angle

jet of particles, mainly mesons

Electron can hit one quark, and be scattered. Exchange of high energy photons leads to the creation of a jet of particles and antiparticles.
