[Ecopolitical Homelessness](#) Gerard Kuperus,2016-05-26 While our world is characterized by mobility global interactions and increasing knowledge we are facing serious challenges regarding the knowledge of the places around us We understand and navigate our surroundings by relying on advanced technologies Yet a truly knowledgeable relationship to the places where we live and visit is lacking This book proposes that we are utterly lost and that the loss of a sense of place has contributed to different crises such as the environmental crisis the immigration crisis

and poverty With a rising number of environmental political and economic displacements the topic of place becomes more and more relevant and philosophy has to take up this topic in more serious ways than it has done so far To counteract this problem the book provides suggestions for how to think differently both about ourselves our relationship to other people and to the places around us It ends with a suggestion of how to understand ourselves in an eco political community one of humans and other living beings as well as inanimate objects This book will be of great interest to researchers and students of environmental ethics and philosophy as well as those interested in the environmental humanities more generally
