Fathoming the Ocean Helen M. Rozwadowski, 2008-03-31 By the middle of the nineteenth century as scientists explored the frontiers of polar regions and the atmosphere the ocean remained silent and inaccessible The history of how this changed of how the depths became a scientific passion and a cultural obsession an engineering challenge and a political attraction is the story that unfolds in *Fathoming the Ocean* In a history at once scientific and cultural Helen Rozwadowski shows us how the Western imagination awoke to the ocean's possibilities in maritime novels in the popular hobby of marine biology in the youthful sport of yachting and in the laying of a trans Atlantic telegraph cable The ocean emerged as important new territory and scientific interests intersected with those of merchant industrialists and politicians Rozwadowski documents the popular crazes that coincided with these interests from children's sailor suits to the home aquarium and the surge in ocean travel She describes how beginning in the 1860s oceanography moved from yachts onto the decks of oceangoing vessels and landlubber naturalists found themselves navigating the routines of a working ship's physical and social structures *Fathoming the Ocean* offers a rare and engaging look into our fascination with the deep sea and into the origins of oceanography origins still visible in a science that focuses the efforts of physicists chemists geologists biologists and engineers on the common enterprise of understanding a vast three dimensional alien space
