down in traversing matter In 1900 Marie Curie stated ²¹ the hypothesis that Hies rayons alpha sont des projectiles materiels susceptibles de perdre de leur vitesse en travers ant la matiere Early attempts to evaluate this were incon clusive for there was not yet an accurate proposed model of the atom Enough experimental evidence was collected in the next decade to make stopping power theory one of the central concerns of those attempting to develop an atomic model J J Thomson director of the prestigious Cavendish Laboratory and Niels Bohr a fresh postdoctoral scientist at Rutherford s Manchester Laboratory both published almost simultaneously^{22 23} an analysis of the stopping of charged particles by matter and each contained many of their divergent ideas on the model of an atom Thomson ignored in his paper the Rutherford alpha particle scattering ²⁴ experiment of a year before But the nuclear atom with a heavy positively ²⁵ charged core was the basis of Bohr s ideas
