Deceptive Relations Annette Roome, 2000 **A Pack of Lies** J. A. Barnes, 1994-06-09 Defining lies as statements that are intended to deceive this book considers the contexts in which people tell lies how they are detected and sometimes exposed and the consequences for the liars themselves their dupes and the wider society The author provides examples from a number of cultures with distinctive religious and ethical traditions and delineates domains where lying is the norm domains that are ambiguous and the one domain science that requires truthtelling He refers to experimental studies on children that show how at an early age they acquire the capacity to lie and learn when it is appropriate to do so He reviews how lying has been evaluated by moralists examines why we do not regard novels as lies and relates the human capacity to lie to deceit among other animal species He concludes that although there are in all societies good pragmatic reasons for not lying all the time there are also strong reasons for lying some of the time [Encyclopedia of Human Relationships](#) Harry T.
