Decision Aids For Selection Problems:

Decision Aids for Selection Problems David L. Olson, 2012-12-06 One of the most important tasks faced by decision makers in business and government is that of selection. Selection problems are challenging in that they require the balancing of multiple often conflicting criteria. In recent years a number of interesting decision aids have become available to assist in such decisions. The aim of this book is to provide a comparative survey of many of the decision aids currently available. The first chapters present general ideas which underpin the methodologies used to design these aids. Subsequent chapters then focus on specific decision aids and demonstrate some of the software which implement these ideas. A final chapter provides a comparative analysis of their strengths and weaknesses.

Decision AIDS for Selection Problems David L. Olson, 1995-11-01 *Tools for Making Acute Risk Decisions* CCPS (Center for Chemical Process Safety), 2010-09-14 The complexity of today's risk decisions is well known. Beyond cost and risk there are many other factors contributing to these decisions including type of risk such as human injury or fatality, the economic impact on the local community, profitability, availability of capital alternatives for reducing or eliminating the risk, costs of implementing alternatives, codes, standards, regulation, and good industry practice. This book presents a large range of decision aids for risk analysts and decision makers in industry so that vital decisions can be made in a more consistent, logical, and rigorous manner. Though primarily aimed at the process industry, this book can be used by anyone who makes similar decisions in other industries including those in management science.
