techniques integrating Tibetan Vajrayana and Patanjali's yoga to induce altered states of consciousness for the exploration of heightened mystical states. Sharing numerous figures and diagrams she shows how these theories and techniques are not only fully supported by modern biophysics, brain science, and quantum physics but are also in line with the work of Rudolf Steiner, G. I. Gurdjieff, Pierre Teilhard de Chardin, Aurobindo Ghose, Max Planck, and David Bohm. The author also shares insights from her own personal practices for consciousness exploration which include prayer, mantra, emptying the mind, psychedelics, yoga, and visualization of interior physiology. Offering a structural map of the dynamics of consciousness, Joye reveals that one can develop new ways of tuning and directing consciousness to reach extraordinary modes of being and intense levels of lucid awareness, the requisites for the direct exploration of supersensible dimensions and sailing in the ocean of consciousness.
