About Faces:

About Faces Sharrona Pearl, 2010-06-15 When nineteenth century Londoners looked at each other what did they see and how did they want to be seen Sharrona Pearl reveals the way that physiognomy the study of facial features and their relationship to character shaped the way that people understood one another and presented themselves Physiognomy was initially a practice used to get information about others but soon became a way to self consciously give information on stage in print in images in research and especially on the street Moving through a wide range of media Pearl shows how physiognomical notions rested on instinct and honed a kind of shared subjectivity She looks at the stakes for framing physiognomy a practice with a long history as a science in the nineteenth century By showing how physiognomy gave people permission to judge others Pearl holds up a mirror both to Victorian times and our own *All about Faces* La ZOO, 2009 Bold illustrations enhance this fun filled introduction to the different features of the face the way it is used to communicate with others and the transformations it can undergo from one moment to the next based on the actions and feelings of its owner

About Face Dan Hill, 2010-09-03 Once advertising was all about being on message and getting talking points right But breakthroughs in brain science have confirmed what we all know but don't often admit to in business people are primarily emotional decision makers From podcasting blogs and forums to interactive ads in stations the heart of the matter is now the consumer's experience as opposed to the company's marketing message About Face shows how 21st century advertising can realize success by being on emotion first and foremost Using data from eye tracking and facial coding to analyse consumer responses About Face demonstrates exactly which advertising strategies are successful and why Moving beyond the old Ps of product price place and promotion Dan Hill outlines ten rules for emotionally effective advertising including simplicity familiarity relevancy and believability Emotions rule decision making About Face shows you that by focussing on the three new Ps of passion purpose and personality your campaigns can become more effective and emotionally engaging taking you closer to the consumer

About Face David H. Hackworth, 2020-09-29 Called everything a war memoir could possibly be by The New York Times this all time classic of the military memoir genre now includes a new forward from bestselling author and retired Navy SEAL Jocko Willink Whether he was fifteen years old or forty David Hackworth devoted his life to the US Army and quickly became a living legend However he appeared on TV in 1971 to decry the doomed war effort in Vietnam From Korea to Berlin and the Cuban missile crisis to Vietnam Hackworth's story is that of an exemplary patriot played against the backdrop of the changing fortunes of America and the US military This memoir is the stunning indictment of the Pentagon's fundamental misunderstanding of the Vietnam conflict and of the bureaucracy of self interest that fueled the war With About Face Hackworth has written what many Vietnam veterans have called the most

important book of their generation and presents a vivid and powerful portrait of patriotism **About Face** Jonathan Cole,1999-02-18 What is special about the face and what happens when neurological conditions make expression or comprehension of the face unavailable Through a mix of science autobiography case studies and speculation Jonathan Cole shows the importance not only of facial expressions for communication among individuals but also of facial embodiment for our sense of self He presents in his words a natural history of the face and an unnatural history of those who live without it The heart of the book lies in the experiences of people with facial losses of various kinds The case studies are of blind autistic and neurologically impaired persons the most extreme case involves Mobius syndrome in which individuals are born with a total inability to move their facial muscles and hence to make facial expressions Cole suggests that it is only by studying such personal narratives of loss that we can understand facial function and something of what all our faces reflect What's Jewish about Butterflies? Maxine Segal Handelman,2004 The themes are broken up into five categories food animals the world around all about me and popular children s book and authors Highlights some of the most common relevant values that could be associated with each theme Also attempts to make Israel as real and relevant as possible by highlighting aspects of Israeli life and culture that expand the theme at hand Face William A. Ewing,Nathalie Herschdorfer,2006 The first full scale study of the face in contemporary photography a challenge to accepted notions of what constitutes a portrait In this groundbreaking publication William A Ewing announces the death of the conventional portrait In an age when we are bombarded with flawless images of youthful beauty when rejuvenation is available through a jar of cream or a scalpel artists and photographers seek to portray the face in new ways Through a variety of techniques including computer manipulation photomontage and retouching the artists present their new portraits They replace clarity with blur the split second with the elastic moment reality with hyperreality questioning the notion of a fixed identity of universality of expression of what constitutes beauty Whether Cindy Sherman s disquieting disguises Gillian Wearing s masked self portrait LawickM ller s composite portraits of couples Thomas Ruff s studiously neutral facade or Orlan s disturbing experiments with cosmetic surgery these faces demand attention Other artists represented in the book include Inez van Lamsweerde and Vinoodh Matadin Martin Parr Philip Lorca diCorcia Rineke Dijkstra Lee Friedlander Barbara Kruger and Tibor Kalman 250 photographs in color and duotone Mineralogical Magazine and Journal of the Mineralogical Society ,1892 **Facial Attractiveness** Leslie Zebrowitz,2001-10-30 Using evolutionary cognitive and social psychology this volume examines the issues raised by the question What makes some faces more attractive than others The authors challenge the views that beauty is simply in the eye of the beholder that it is idiosyncratic and that it is nothing more than an artifact of culture They argue instead that there are a variety of biological social motivational and developmental issues involved in facial attractiveness By exploring attractiveness and preference from these various perspectives this collection offers profound and unique insight on how and why we are attracted to certain facial types and how that attraction can influence our social

interaction Some of the ideas presented in Facial Attractiveness are surprising others controversial and others even paradoxical Combined however they offer a new perspective on age old questions of attraction beauty and preference Each author challenges standard assumptions about beauty and encourages the reader to explore new trends in evolutionary social and cognitive psychology in search of a more coherent answer to the questions of what makes a face attractive and why
