

CAUTION (Continued):

A. Adjust the heating or cooling system to force outside air into the vehicle as follows:

1. On vehicles not equipped with air conditioning, set the fan to medium or high speed.
2. On vehicles equipped with air conditioning, set the fan to an intermediate or high speed and the right-hand control lever to any position except "MAX — A/C".

B. Keep the exhaust tailpipe area clear of snow and other material to help reduce the buildup of exhaust gases under the vehicle. This is particularly important when parked in blizzard conditions.

Driving with tailgates, rear doors or rear windows open is not recommended. Under some conditions, exhaust gases may be drawn into the vehicle. If the tailgate, liftgate or rear window must remain open for some reason while moving, or if electrical wiring or other cable connections to a trailer must pass through the seal between the tailgate or liftgate and the body, follow these precautions:

- Close all windows.
- Adjust the heating or cooling system to force outside air into the vehicle as described above, but set the fan to high speed.
- On vehicles with outside air vents in or under the instrument panel, open the vents fully.

Take special care to prevent the chance of carbon monoxide exposure if a change is made to the vehicle (such as using a camp stove or camper), or if a special body or other equipment is added for recreational or other usage. Also, some recreational vehicle gas powered appliances (such as generator lights, refrigerator, stoves and heaters) may give off carbon monoxide. Use these appliances only if there is enough ventilation and follow the appliance manufacturer's instructions regarding the use of these items.

NEW VEHICLE "BREAK-IN" PERIOD

You can drive your new vehicle from its very first start to the end of its useful life without following a formal "break-in" schedule. However, there are things you can do during the first few hundred kilometers or during that will add to the future performance and economy of your vehicle.

We recommend you limit your speed during the first 1000 kilometers to a maximum of 50 mph (80 km/h), but do not drive for long periods at any one constant speed, either fast or slow. During this time, avoid full throttle starts and, if possible, avoid hard stops completely during the first 200 miles (320 kilometers) of driving.

Always drive at moderate speed until the engine has completely warmed up.

If you plan to use your new vehicle for trailer towing, refer to the following:

TRAILER TOWING

Since this vehicle is designed and intended to be used mainly as a load-carrying vehicle, towing a trailer will affect handling, durability and economy. Your safety and satisfaction depend upon proper use of correct equipment. Also, you should avoid overloads and other abusive use.

The maximum loaded trailer weight you can pull with your vehicle depends on your intended use and what special equipment has been installed on it.

Information on trailer towing ability, special equipment required, and optional equipment available should be obtained from your dealer. Ask for the "Recreational & Trailering Guide" brochure. Or write: Customer Assistance Department, Chevrolet Motor Division, P.O. Box 7047, Troy Michigan 48067. (In Canada, write to General Motors of Canada Limited, Customer Services Department, Oshawa, Ontario L1J 5Z8.)

TIRES

When towing trailers, inflate the tires to the cold tire pressures (PSI Cold) shown on the Certification Label (on the rear edge of the driver's door) or, if applicable, the "Tire Inflation Pressure" charts at the back of Section 5.

Remember that when a trailer is connected, the trailer tongue weight is part of the load being carried by the vehicle and, therefore, is included in the GVW of the vehicle.

MAINTENANCE

More frequent service is required when using your vehicle to pull a trailer. Refer to the Maintenance Schedule booklet for Automatic Transmission Fluid, Engine Oil and Rear Axle Lubricant change requirements for trailering.

Now and then, check that all trailer hitch bolts and nuts are tight. Also refer to the Maintenance Schedule booklet, and the Index in this manual, for important facts on belts, cooling system care and brake adjustment.

BREAK-IN SCHEDULE

Refer to the new vehicle break-in information in this manual. Also, we recommend you drive your new vehicle for 500 miles (800 kilometers) before trailer towing. At the end of this 500 mile (800 kilometers) break-in period, avoid speeds over 50 mph (80 km/h) and full throttle starts during the first 500 miles (800 kilometers) of trailer towing.
